

*Punch's commentary on Darwin's last work on worms (Punch 22 October 1881, p. 190)*

Darwinova karikatura z roku 1871

*The genetic makeup of chimpanzees and humans is more than 99 percent identical, according to molecular biologists. It seems to mean we had a common ancestor less than five or six million years ago (see chapter eight), and is a puzzle to geneticists who would have expected a bigger difference to account for the anatomical dissimilarity. Victorian illustrators, however, were quick to discover the comic possibilities in "Mr. Darwin's monkey theory."*

ЧАРЛЬЗЪ ДАРВИНЪ.

Род. 12 февр. 1809 г., ум. 19 апр. 1882 г.
