

I was born in New York City  
Went to Harvard University  
Now they call me professor  
Brian Green the professor

My research's on the string theory  
Essential for quantum gravity  
And if you don't know what's up with time  
My books will explain all that in rhyme

My hip-hop friends call me Big G  
'Cause when I take the mic there's none but me  
Fighting for physics on the stage  
Just me and my DJ
