

52. Michel Foucault, *The Archaeology of Knowledge* (New York: Pantheon, 1972) 203. In addition to his published work, I have found Hubert L. Dreyfus and Paul Rabinow, *Michel Foucault: Beyond Structuralism and Hermeneutics*, 2nd ed. (Chicago: U of Chicago P, 1983), to be an excellent reading of Foucault in both its appreciation for his brilliant insights and its criticism of the development of his thought.
