

QualiM

atlas.ti

❖ Úvod

❖ Teorie kódování

❖ Použití programu Atlas.TI:

- Nahrávání dokumentů
- Vytváření kódů
- Kódování fotografií
- Kódování dokumentu
- Vztahy
- Auto-kódování
- Tvorba výstupů: list citací, síť, frekvence

❖ Shrnutí

Obsah

A white highlighter pen is positioned diagonally across the top of an open book. The book's pages are filled with text, which is slightly out of focus. The overall image has a soft, monochromatic aesthetic with a light gray background.

ÚVOD

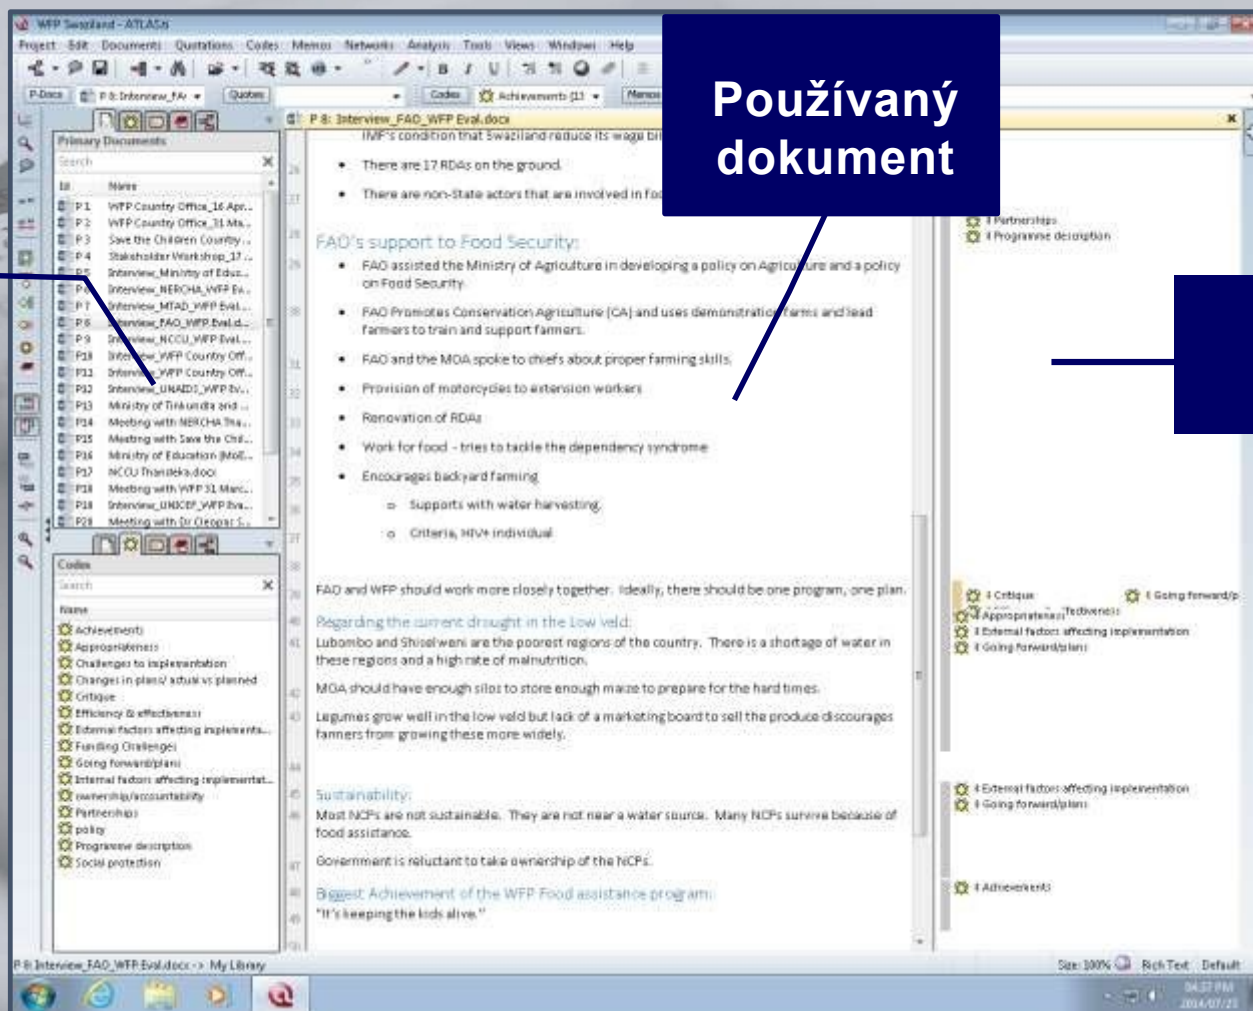

Co je Atlas.TI?

Počítačem podporovaný software pro analýzu dat kvality
Computer assisted quality data analysis software (CAQDAS)

Boční okna:
kódy
dokumenty
sítě

Používaný
dokument

Kódy

Co umožňuje Atlas.TI?

❖ Kvalitativní kódování

- ruční
- automatické

❖ Kódovat

- Dokumenty (textové a PDF) - přepisy rozhovorů, pracovní dokumenty, deníky
- Fotografie - pozorování
- Grafika – porovnání, teorie změn

Jaké jsou výstupy Atlas.TI?

❖ **Prezentace výstupů na základě dat (outputs)**

- **Seznamy**
- **Frekvence**
- **Sítě**

Kdy použít program Atlas.TI?

❖ Chcete-li se věnovat těmto činnostem:

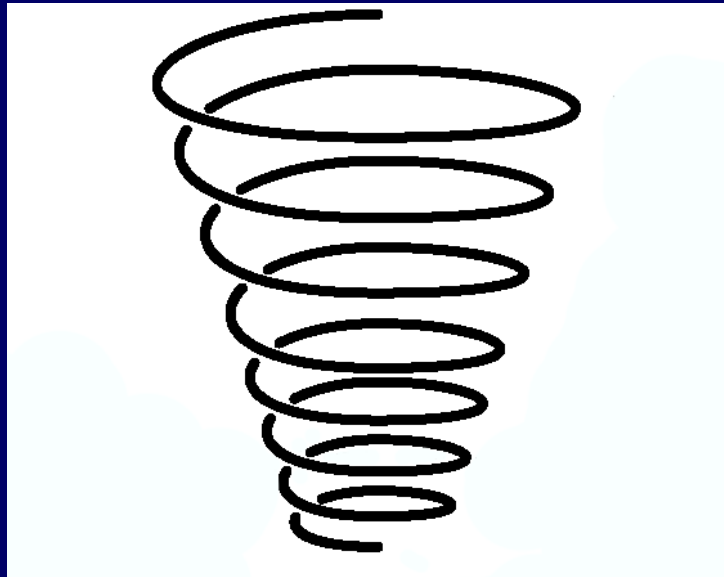

- Recenze literatury
- Analýza dokumentů
- Analýza rozhovorů
- Analýza fotodokumentace

A white highlighter pen is positioned diagonally across the top of an open book. The book's pages are filled with text, which is slightly out of focus. The overall image has a soft, monochromatic aesthetic with a light gray background.

KÓDOVÁNÍ

Kódování

❖ Iterační proces

❖ Může vyžadovat různé fáze kódování

Kódování je jako astronomické pozorování

NEBE

Hvězdy

Kdepak je LEV?

Kódování je jako astronomické pozorování

Kódování je jako astronomické pozorování

Kódování je jako astronomické
pozorování

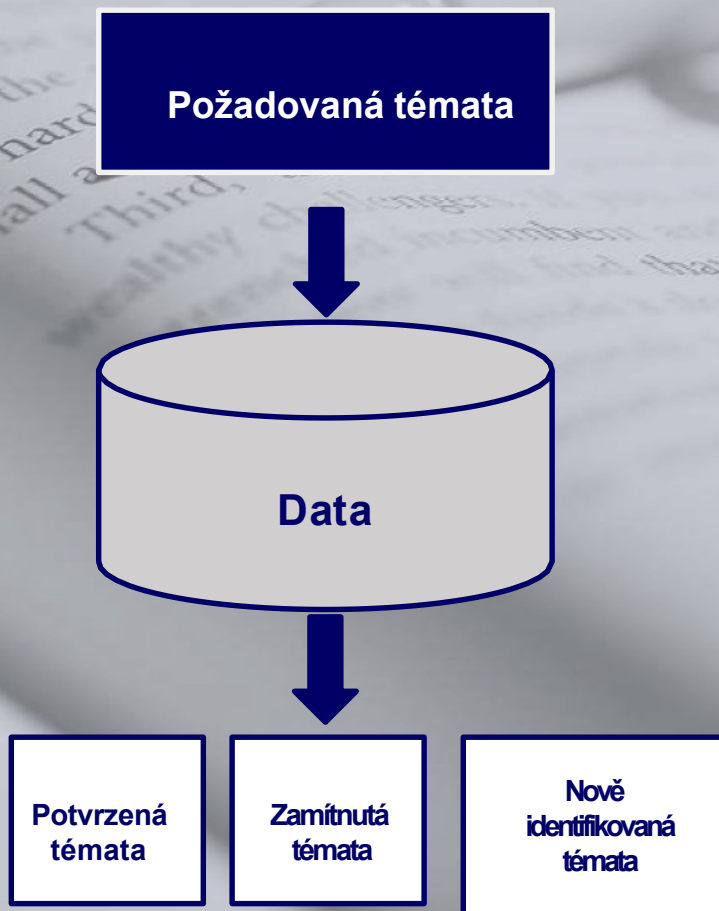

Kódování je jako astronomické pozorování

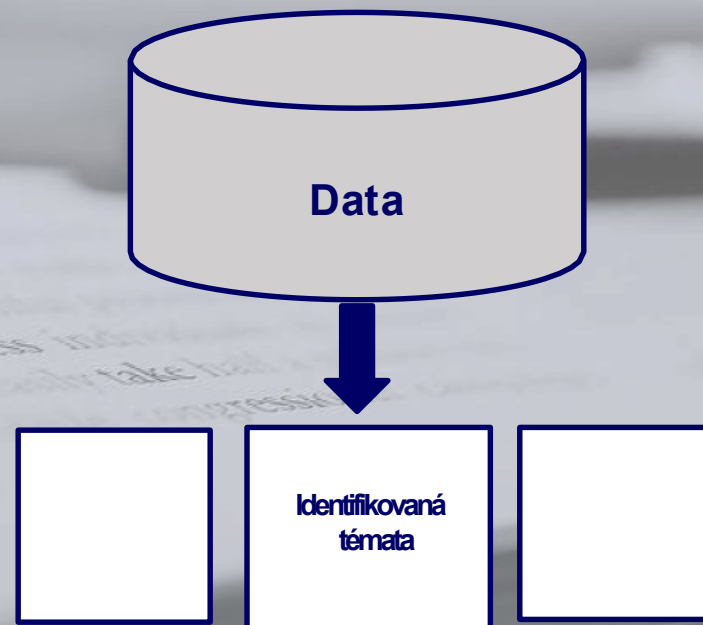

Kódování

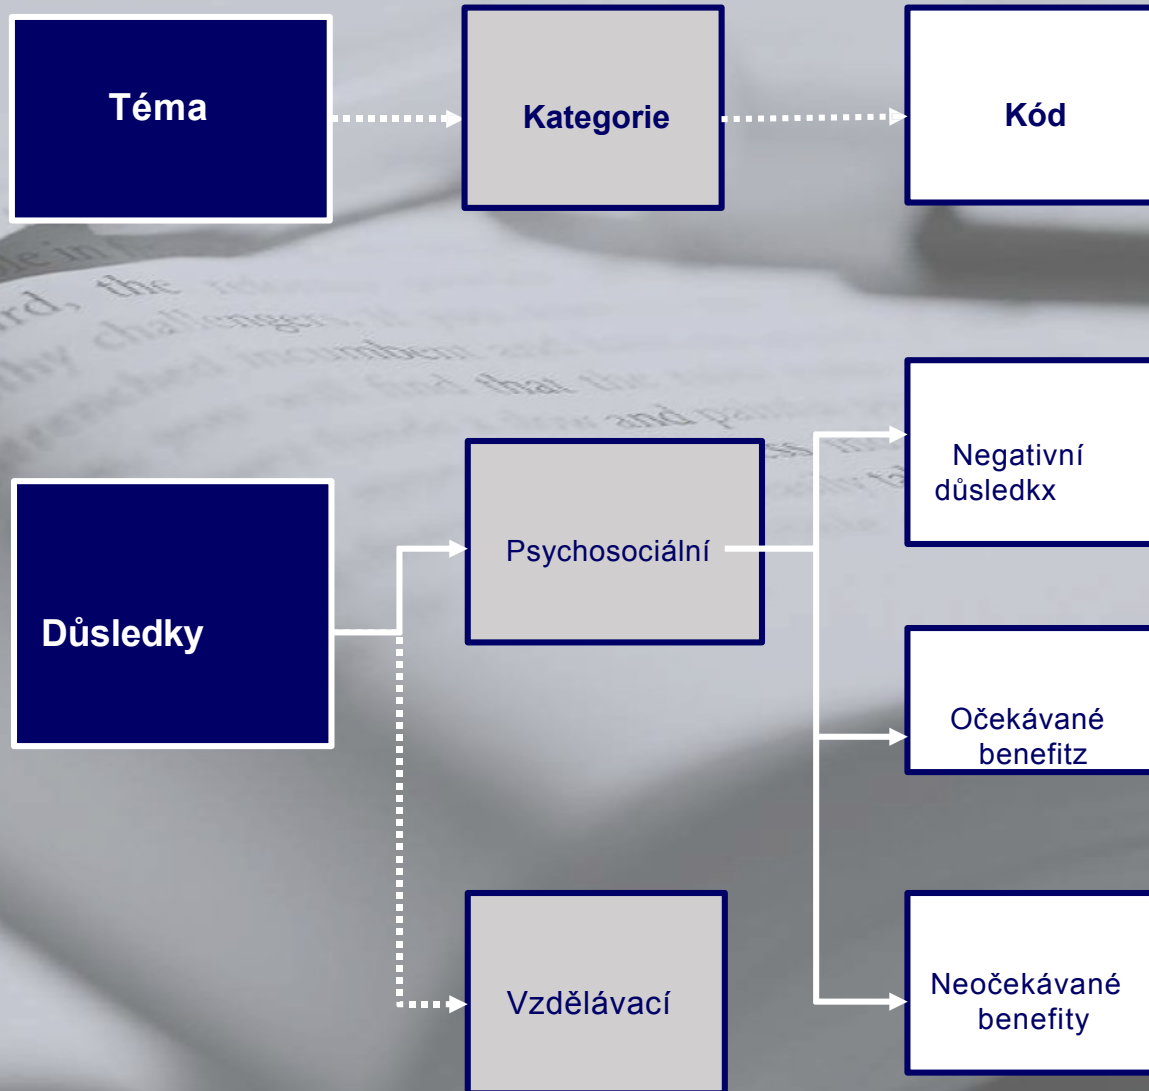

Deduktivní

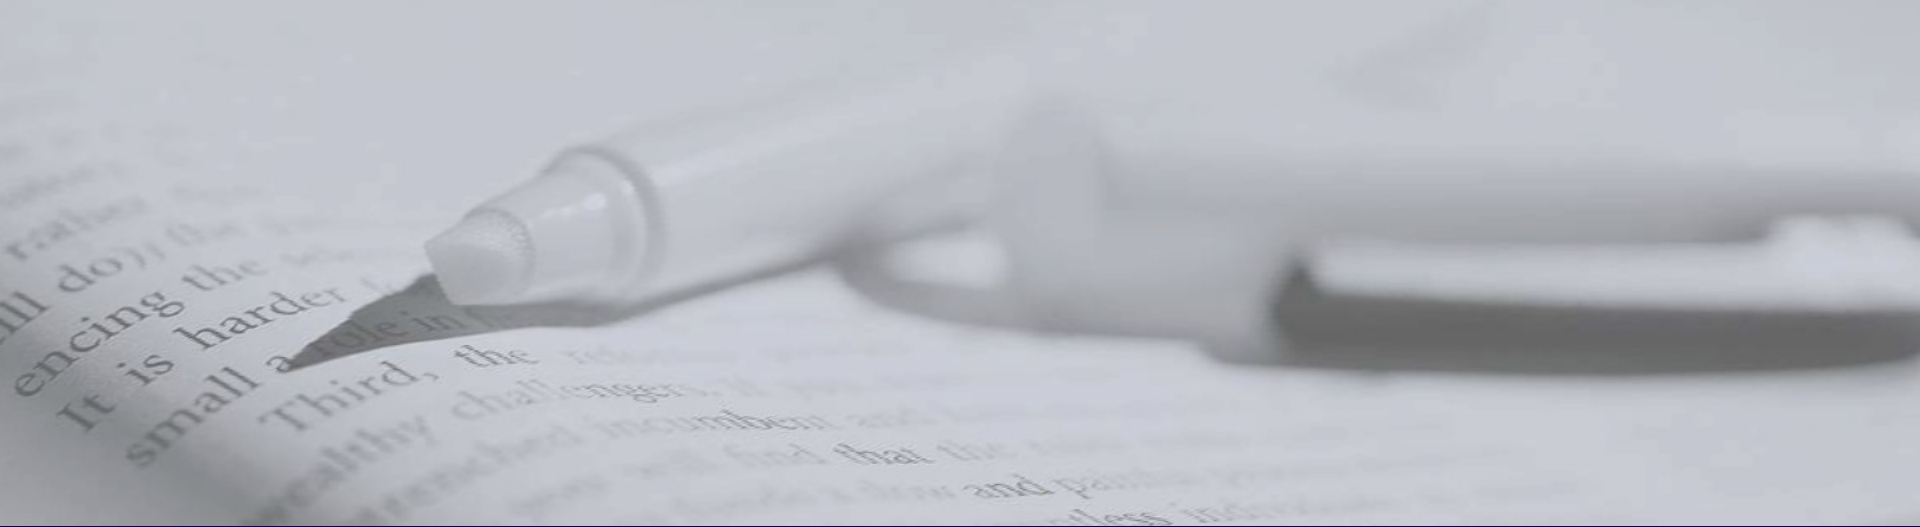

Induktivní

Témata, kategorie a kódy

Tvorba témat a kódů

- ❖ **Jaké informace potřebuji, aby mohla být zodpovězena výzkumná otázka? (Témata)**
- ❖ **Vytvářejte témata, která chcete hledat a hledejte kódy, které reprezentují hledaná témata**
- ❖ **Slučujte kódy a/nebo tvořte rodiny kódů a vytvořte kategorie**

Tvorba témat a kódů

❖ Kódujte VÝZNAM

- Např...: psychosociální benefity, pozitivní spolupráce

❖ Držte se jednoduchosti (keep it SIMPLE)

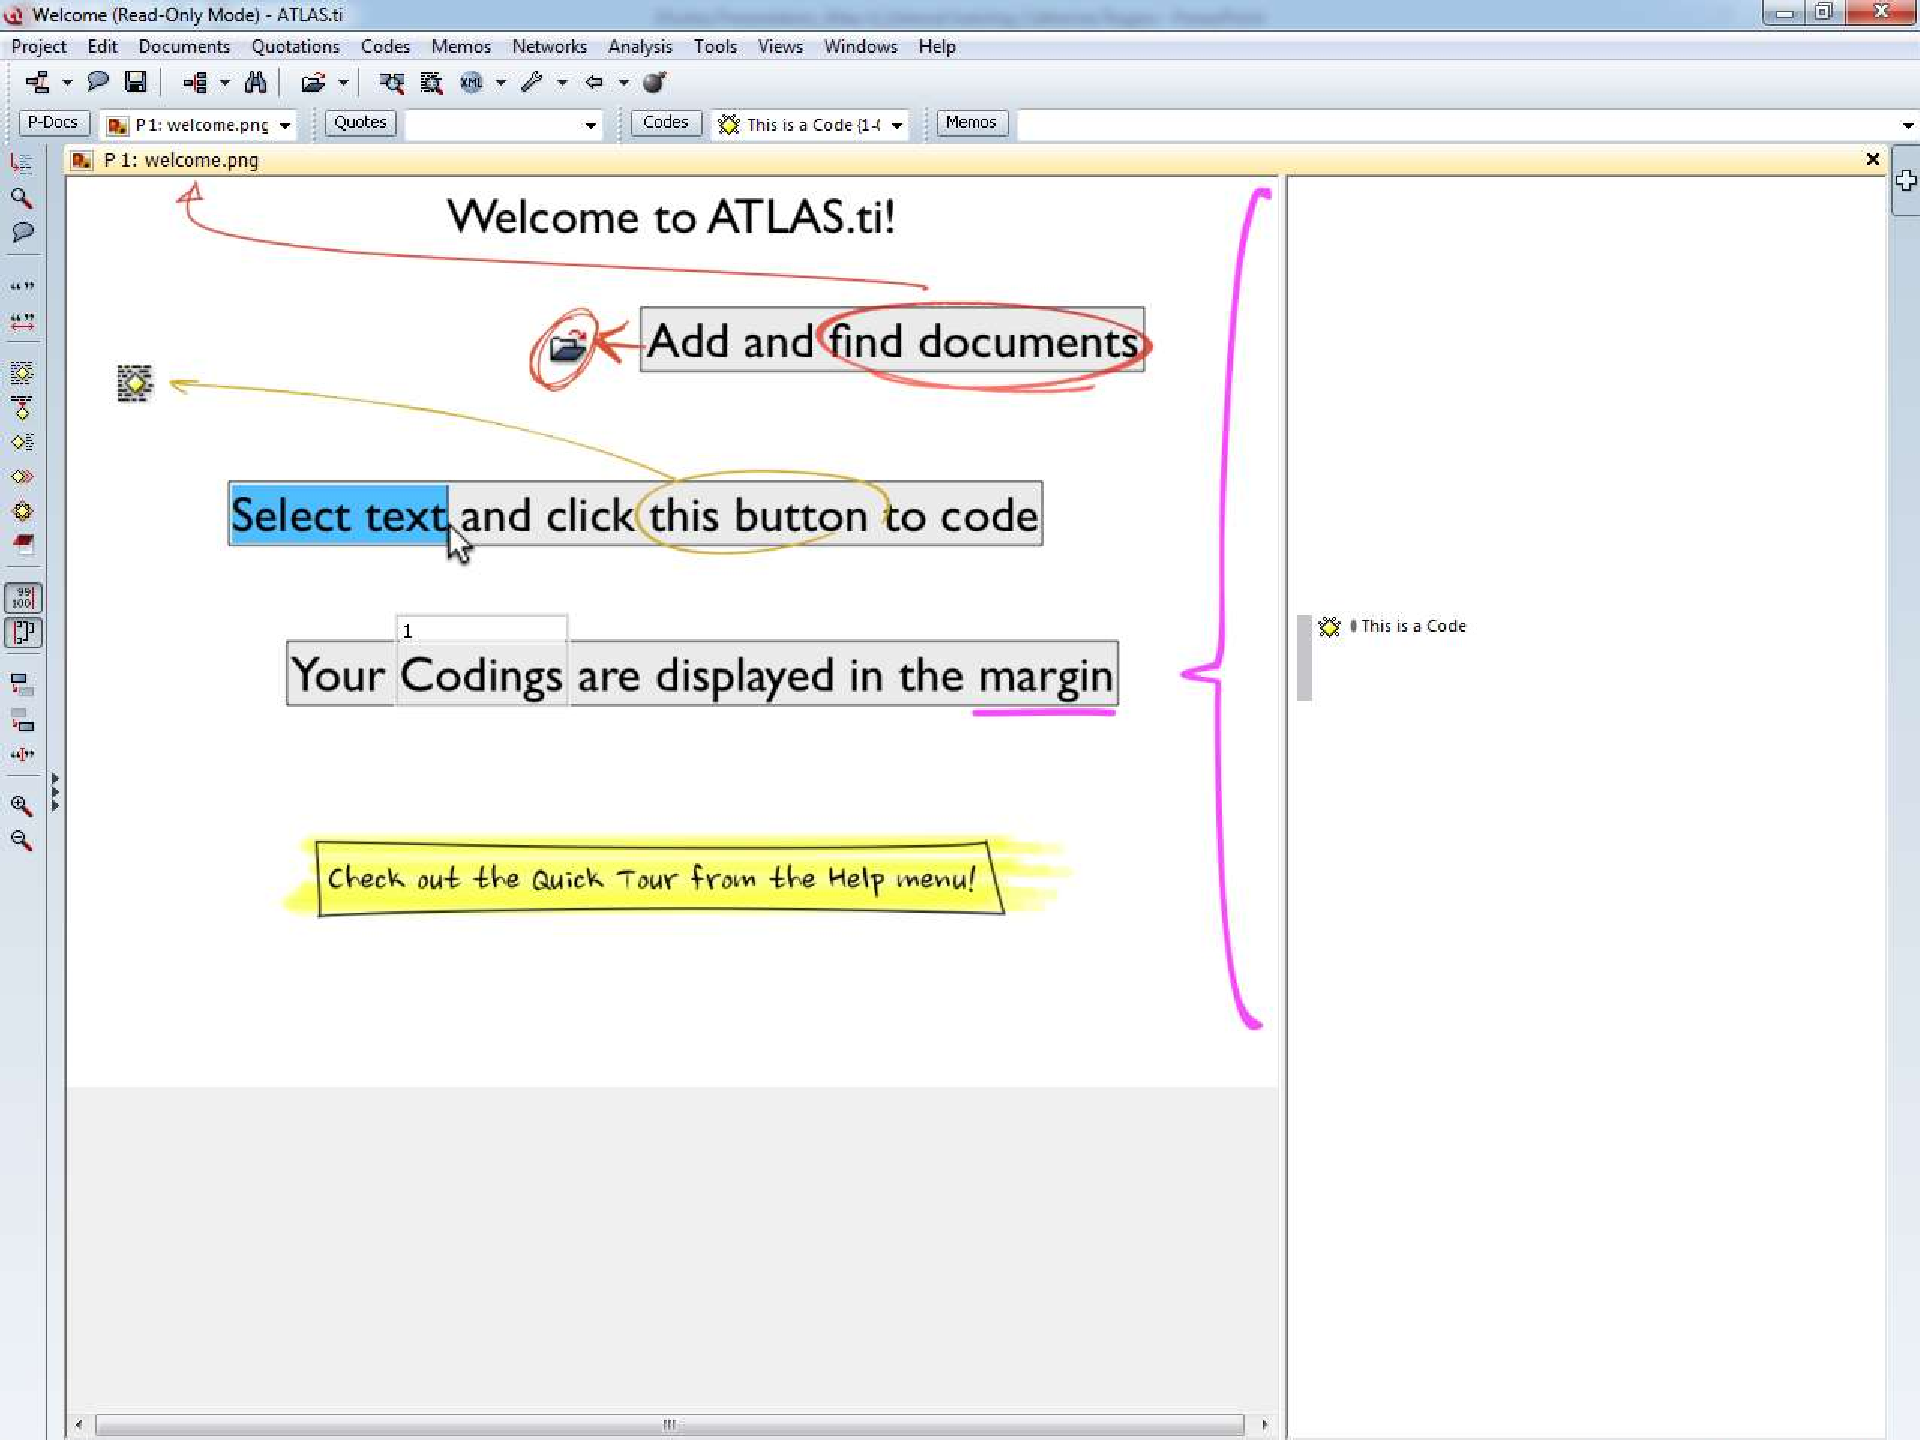

- Lépe méně užitečných kódů nežli spooousty kódů

Omezení a limity

- ❖ Automatické kódování identifikuje slova nikoli významy (například kóduje i otázky tazatele)
- ❖ Uspořádává data, ale neanalyzuje je
- ❖ Nabízí „prázdná“ čísla (například o frekvenci kódů, množství neznamená významnost)

001 Transcript - Bill Moyers interviews Bill Gates
002 http://www.pbs.org/now/printable/transcript_gates_print.html
003
004 MOYERS: When I first heard that you were going to give away billions of dollars to, global health I was skeptical. I mean, no one can doubt that you know everything there is to know about information

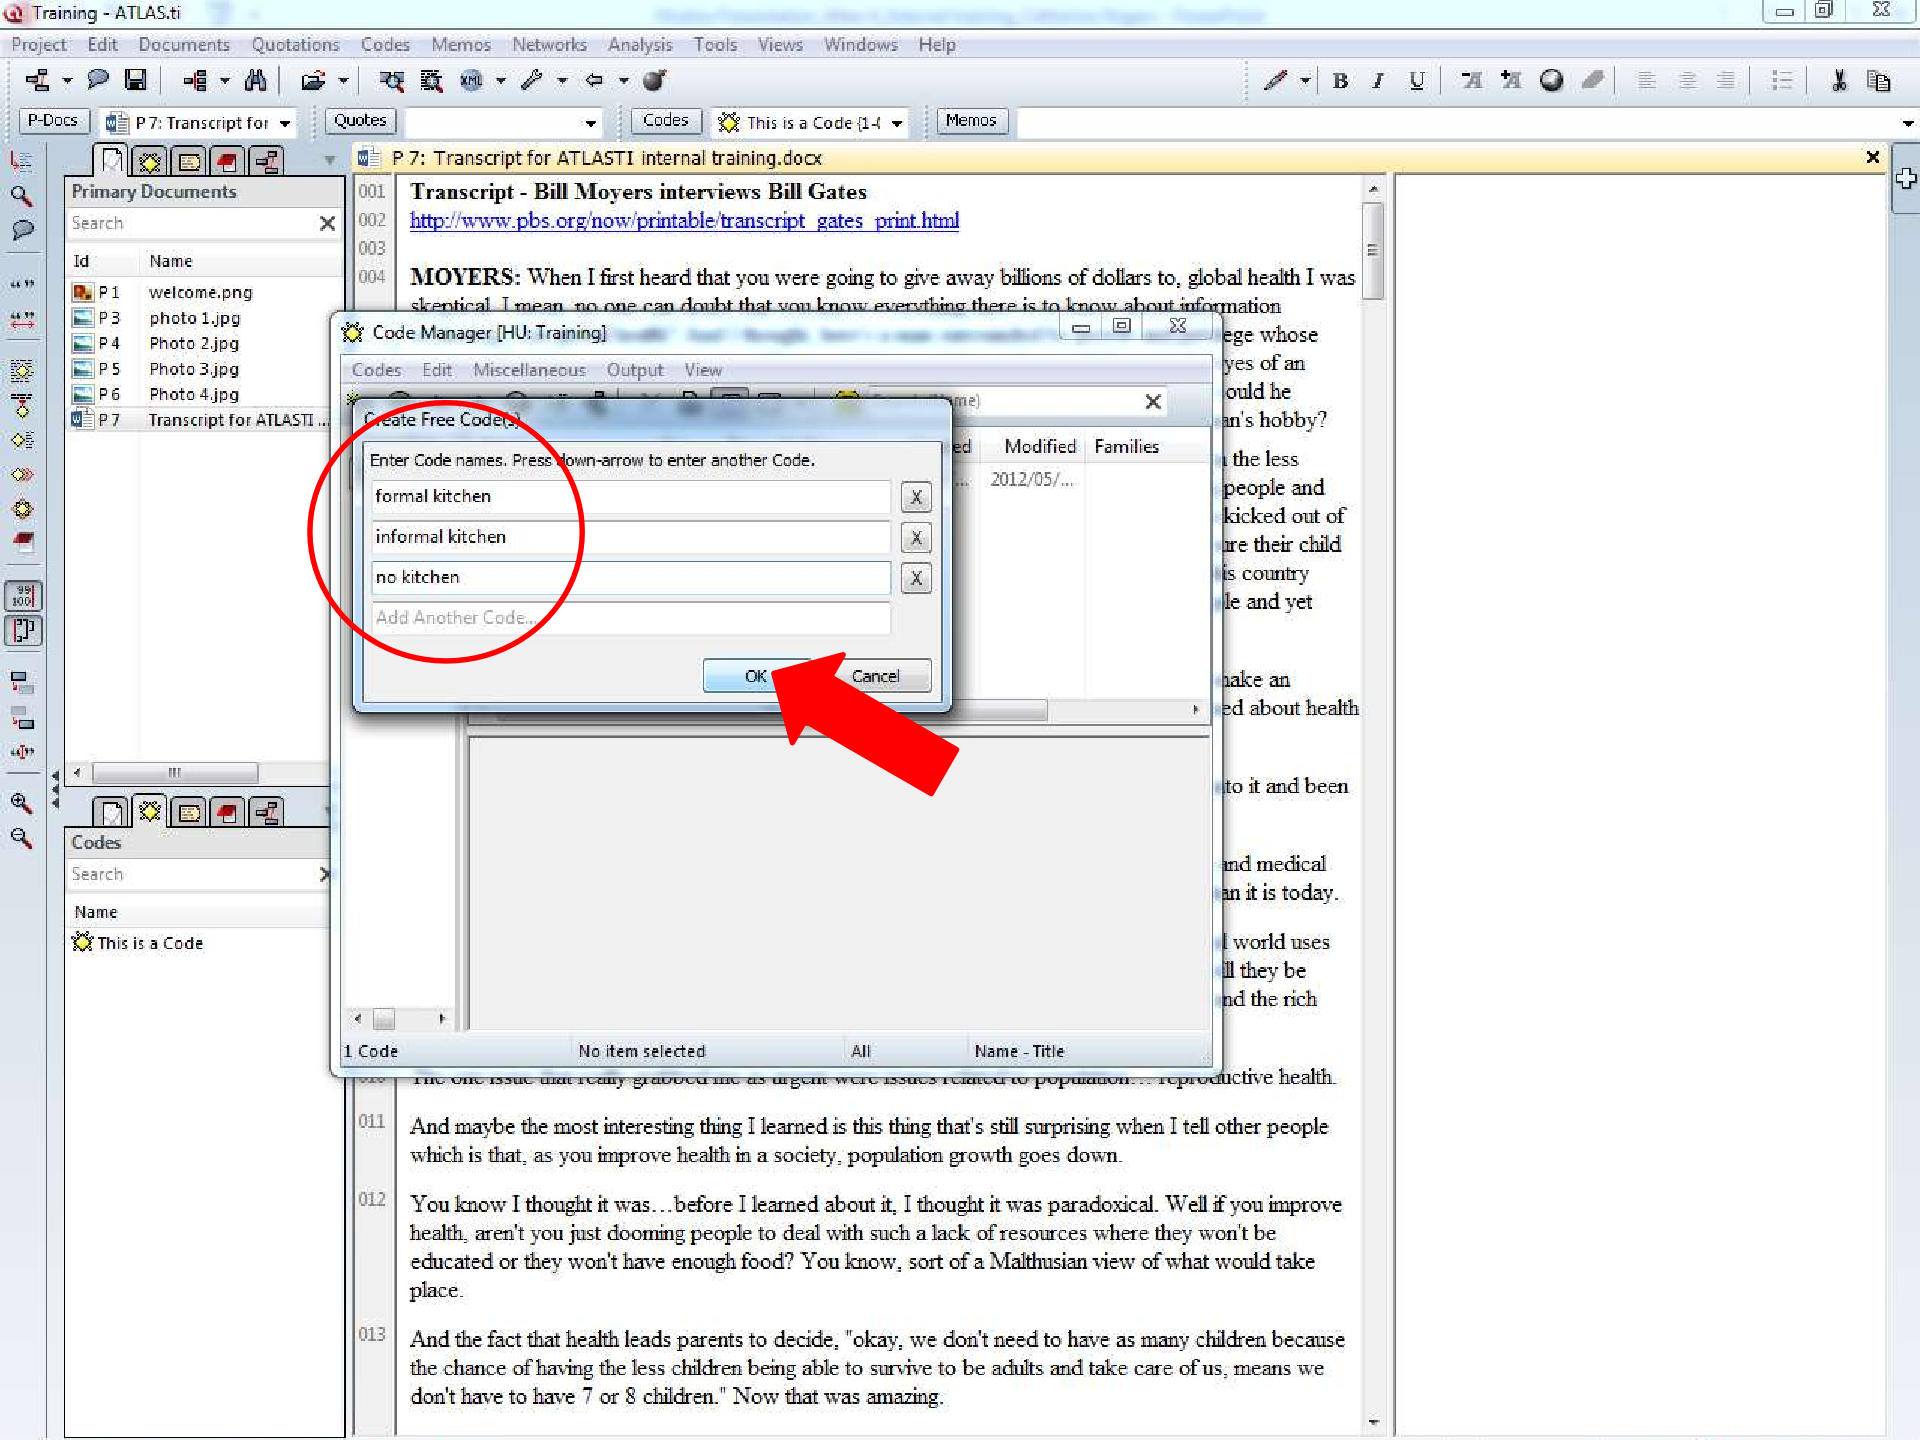

...ege whose
...yes of an
...ould he
...an's hobby?
...the less
...people and
...kicked out of
...are their child
...is country
...le and yet
...ake an
...ed about health
...to it and been
...and medical
...an it is today.
...world uses
...ll they be
...and the rich

...the one issue that really grabbed me as urgent were issues related to population... reproductive health.

011 And maybe the most interesting thing I learned is this thing that's still surprising when I tell other people which is that, as you improve health in a society, population growth goes down.

012 You know I thought it was... before I learned about it, I thought it was paradoxical. Well if you improve health, aren't you just dooming people to deal with such a lack of resources where they won't be educated or they won't have enough food? You know, sort of a Malthusian view of what would take place.

013 And the fact that health leads parents to decide, "okay, we don't need to have as many children because the chance of having the less children being able to survive to be adults and take care of us, means we don't have to have 7 or 8 children." Now that was amazing.

001 **Transcript - Bill Moyers interviews Bill Gates**
002 http://www.pbs.org/now/printable/transcript_gates_print.html
003
004 **MOYERS:** When I first heard that you were going to give away billions of dollars to, global health I was skeptical. I mean, no one can doubt that you know everything there is to know about information technology, but global health? And I thought, here's a man surrounded by power and privilege whose every need and every comfort are met. How could he possibly see the world through the eyes of an impoverished woman with HIV in India or a hungry, starving child in Mozambique? How could he possibly get inside of their way of seeing the world so that what he did wasn't just a rich man's hobby?
005 **GATES:** Certainly I'll never be able to put myself in the situation that people growing up in the less developed countries are in. I've gotten a bit of a sense of it by being out there and meeting people and talking with them. And one of the gentlemen I met with AIDS talked about how he'd been kicked out of where he'd lived and how he felt awful he'd given it to his wife and their struggle to make sure their child didn't have it, and the whole stigma thing, when you get sick people generally reach out, some of these diseases it's quite the opposite.
006 So what I was thinking about was where my impact, I thought "okay, what's the greatest impact and the unbelievable inequity, it kind of stunned me."
007 **MOYERS:** You could have chosen any field to be celebrated. How did you come to this one?
008 **GATES:** The two areas that are changing in technology and medical technology. Those are the things that the world will be very different 20 years from now than it is today.
009 I'm so excited about those advances. And they actually feed off of each other. The medical world uses the information tools to do their work. And so when you have those advances you think will they be available to everyone. Will they not just be for the rich world or even just the rich people and the rich world? Will they be for the world at large?
010 The one issue that really grabbed me as urgent were issues related to population... reproductive health.

How to use the program:

The screenshot displays the ATLAS.ti software interface. The main window shows a transcript document titled "P 7: Transcript for ATLASTI internal training.docx". The transcript content includes:

001 **Transcript - Bill Moyers interviews Bill Gates**
002 http://www.pbs.org/now/printable/transcript_gates_print.html
003
004 **MOYERS:** When I first heard that you were going to give away billions of dollars to, global health I was skeptical. I mean, no one can doubt that you know everything there is to know about information technology, but global health? And I thought, here's a man surrounded by power and privilege whose every need and every comfort are met. How could he possibly see the world through the eyes of an impoverished woman with HIV in India or a hungry, starving child in Mozambique? How could he possibly get inside of their way of seeing the world so that what he did wasn't just a rich man's hobby?
005 **GATES:** Certainly I'll never be able to put myself in the situation that people growing up in the less developed countries are in. I've gotten a bit of a sense of it by being out there and meeting people and talking with them. And one of the gentlemen I met with AIDS talked about how he'd been kicked out of where he'd lived and how he felt awful he'd given it to his wife and their struggle to make sure their child didn't have it, and the whole stigma thing, which, you know, that's hard to appreciate. In this country when you get sick people generally reach out, you know, that's the time to help other people and yet some of these diseases it's quite the opposite.
006 So what I was thinking about was where my resources that I'm the steward of be able to make an impact, I thought "okay, what's the greatest inequity left?" And to me, and the more I learned about health and the unbelievable inequity, it kind of stunned me, it shocked me, every step of the way.
007 **MOYERS:** You could have chosen any field, any subject, any issue and poured billions into it and been celebrated. How did you come to this one? To global health?
008 **GATES:** The things that are changing in this amazing way are information technology and medical technology. Those are the things that the world will be very different 20 years from now than it is today.
009 I'm so excited about those advances. And they actually feed off of each other. The medical world uses the information tools to do their work. And so when you have those advances you think will they be available to everyone. Will they not just be for the rich world or even just the rich people and the rich world? Will they be for the world at large?
010 The one issue that really grabbed me as urgent were issues related to population... reproductive health.
011 And maybe the most interesting thing I learned is this thing that's still surprising when I tell other people which is that, as you improve health in a society, population growth goes down.
012 You know I thought it was... before I learned about it, I thought it was paradoxical. Well if you improve health, aren't you just dooming people to deal with such a lack of resources where they won't be educated or they won't have enough food? You know, sort of a Malthusian view of what would take place.
013 And the fact that health leads parents to decide, "okay, we don't need to have as many children because the chance of having the less children being able to survive to be adults and take care of us, means we don't have to have 7 or 8 children." Now that was amazing.

The interface also shows a "Primary Documents" list on the left with items like "welcome.png", "photo 1.jpg", "photo 2.jpg", "photo 3.jpg", "photo 4.jpg", and "Transcript for ATLASTI...". Below that is a "Codes" list with "formal kitchen", "informal kitchen", "no kitchen", "rationale", and "This is a Code". The "rationale" code is highlighted in blue, and a yellow arrow points from it to the highlighted text in the transcript. A red arrow points to the right side of the transcript window.

How to use the program:

The screenshot displays the ATLAS.ti software interface. At the top, the title bar reads "Training - ATLAS.ti". Below it is a menu bar with options: Project, Edit, Documents, Quotations, Codes, Memos, New Works, Analysis Tools, View, Windows, and Help. A toolbar contains various icons for document management and analysis. The main window shows a document titled "P 7: Transcript for ATLASTI internal training.docx".

On the left side, there are two panels:

- Primary Documents:** A list of documents with columns for "Id" and "Name". The list includes:
 - P1 welcome.png
 - P3 photo 1.jpg
 - P4 Photo 2.jpg
 - P5 Photo 3.jpg
 - P6 Photo 4.jpg
 - P7 Transcript for ATLASTI ...
- Codes:** A list of codes with columns for "Name" and "This is a Code". The list includes:
 - formal kitchen
 - informal kitchen
 - no kitchen
 - rationale
 - This is a Code

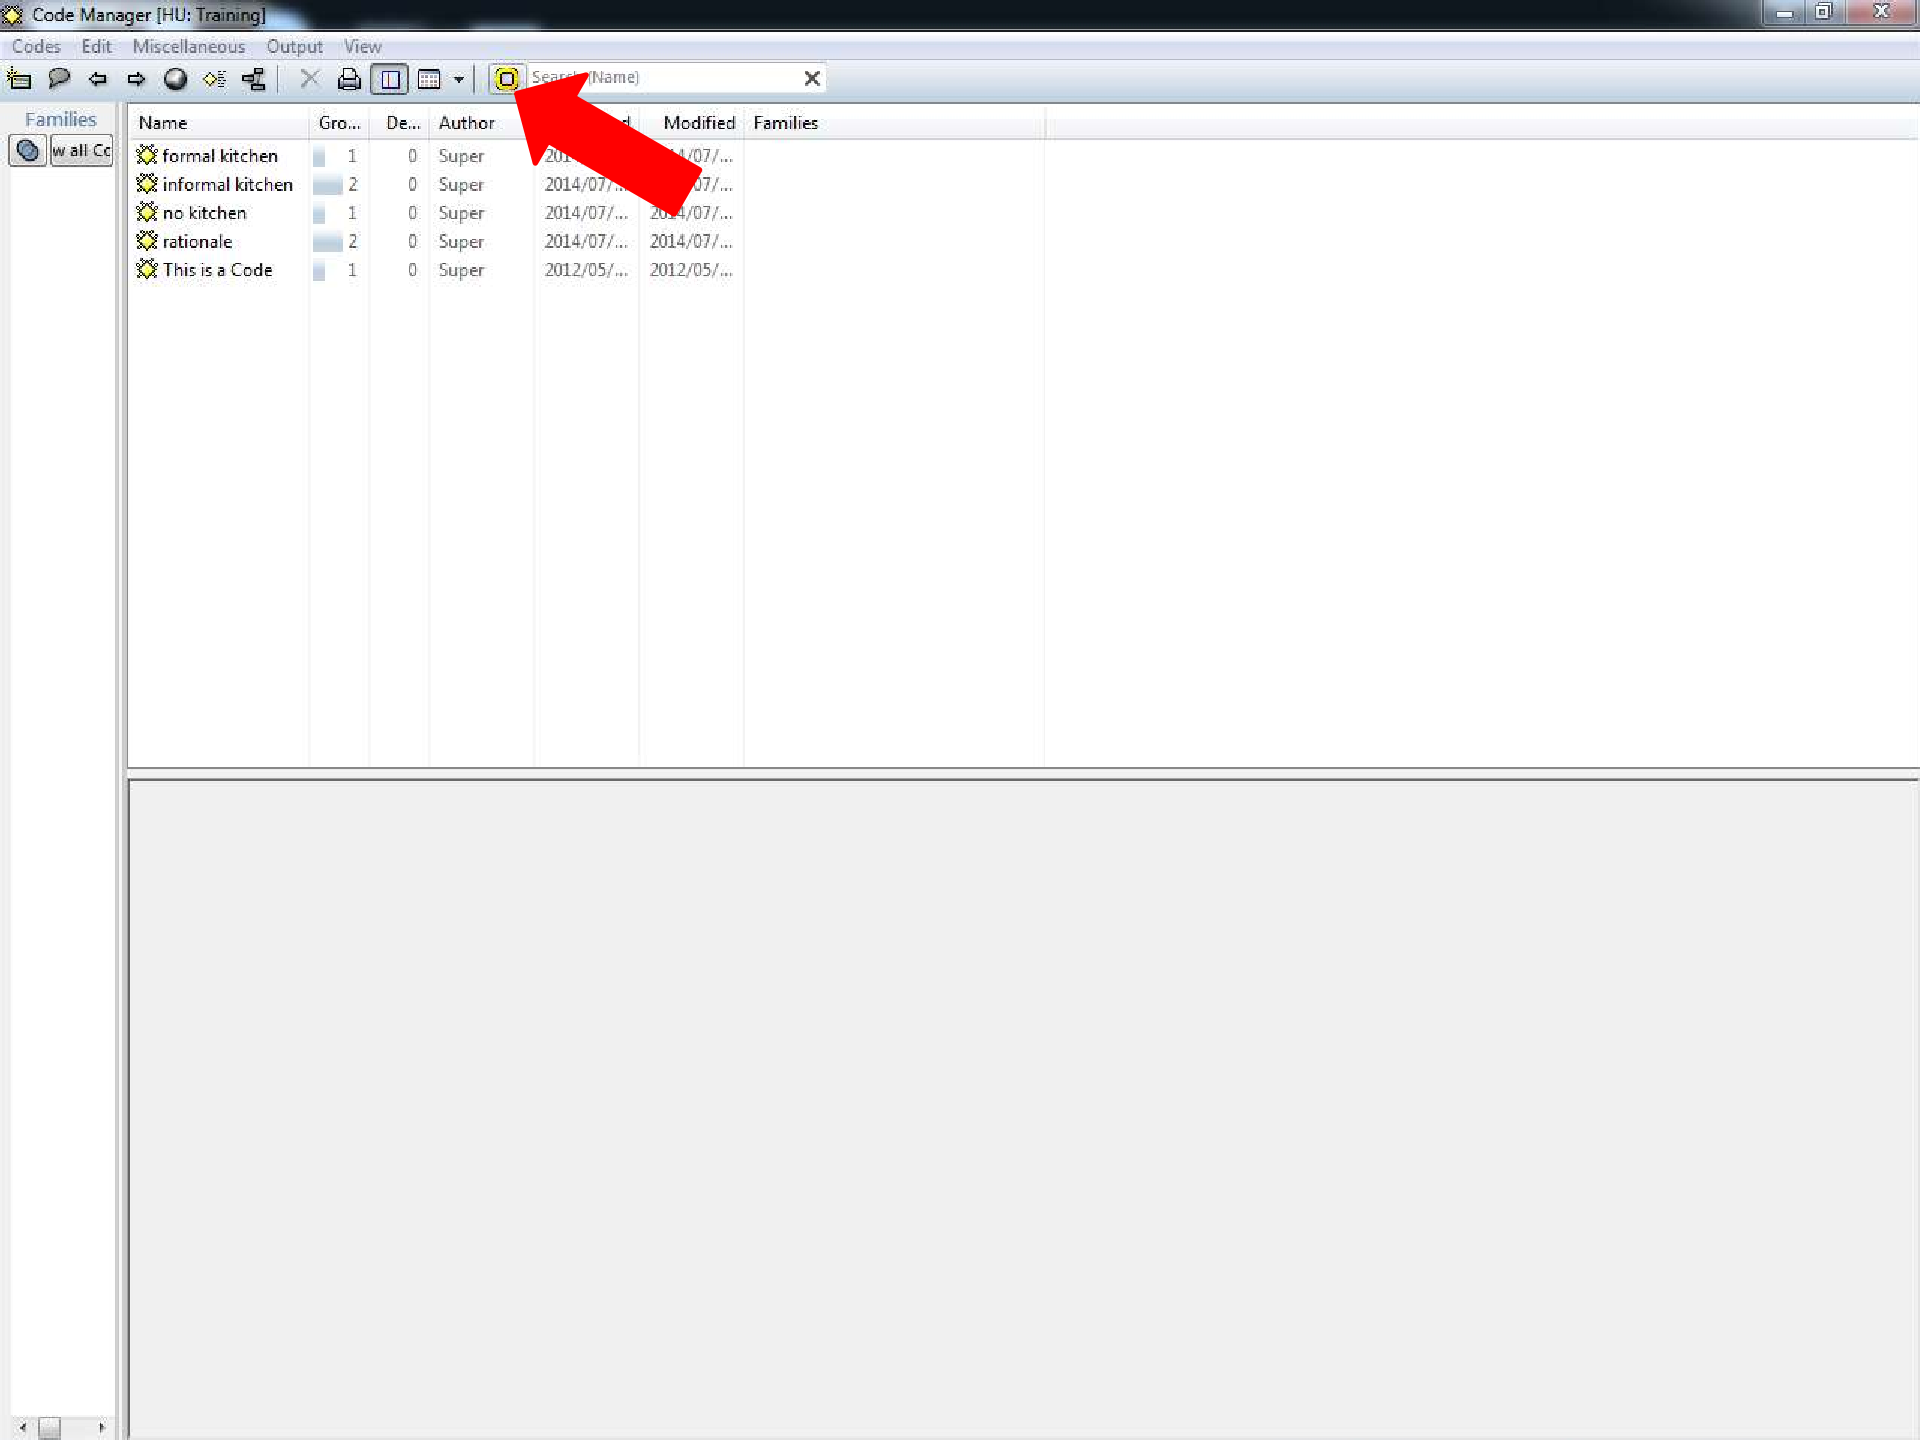

The main text area displays a transcript with line numbers on the left (001 to 013). The text includes:

001 **Transcript - Bill Moyers interviews Bill Gates**
002 http://www.pbs.org/now/printable/transcript_gates_print.html
003
004 **MOYERS:** When I first heard that you were going to give away billions of dollars to, global health I was skeptical. I mean, no one can doubt that you know everything there is to know about information technology, but global health? And I thought, here's a man surrounded by power and privilege whose every need and every comfort are met. How could he possibly see the world through the eyes of an impoverished woman with HIV in India or a hungry, starving child in Mozambique? How could he possibly get inside of their way of seeing the world so that what he did wasn't just a rich man's hobby?
005 **GATES:** Certainly I'll never be able to put myself in the situation that people growing up in the less developed countries are in. I've gotten a bit of a sense of it by being out there and meeting people and talking with them. And one of the gentlemen I met with AIDS talked about how he'd been kicked out of where he'd lived and how he felt awful he'd given it to his wife and their struggle to make sure their child didn't have it, and the whole stigma thing, which, you know, that's hard to appreciate. ... just heard that you were going to give away \$100 million of dollars to, global health I
no one can doubt that you know everything there is to know about information
health? And I thought, here's a man surrounded by power and privilege whose
comfort are met. How could he possibly see the world through the eyes of an
with HIV in India or a hungry, starving child in Mozambique? How could he
their way of seeing the world so that what he did wasn't just a rich man's hobby?
I never be able to put myself in the situation that people growing up in the less
re in. I've gotten a bit of a sense of it by being out there and meeting people and
I one of the gentlemen I met with AIDS talked about how he'd been kicked out
d how he felt awful he'd given it to his wife and their struggle to make sure their
d the whole stigma thing, which, you know, that's hard to appreciate. In this
sick people generally reach out, you know, that's the time to help other people
diseases it's quite the opposite.

006 So what I was thinking about was where my resources that I'm the steward of be able to make an
impact, I thought "okay, what's the greatest inequity left?" And to me, and the more I learned about
health and the unbelievable inequity, it kind of stunned me, it shocked me, every step of the way.

007 **MOYERS:** You could have chosen any field, any subject, any issue and poured billions into it and
been celebrated. How did you come to this one? To global health?

008 **GATES:** The two areas that are changing in this amazing way are information technology and medical
technology. Those are the things that the world will be very different 20 years from now than it is
today.

009 I'm so excited about those advances. And they actually feed off of each other. The medical world uses
the information tools to do their work. And so when you have those advances you think will they be
available to everyone. Will they not just be for the rich world or even just the rich people and the rich
world? Will they be for the world at large?

010 The one issue that really grabbed me as urgent were issues related to population... reproductive
health.

011 And maybe the most interesting thing I learned is this thing that's still surprising when I tell other people
which is that, as you improve health in a society, population growth goes down.

012 You know I thought it was... before I learned about it, I thought it was paradoxical. Well if you
improve health, aren't you just dooming people to deal with such a lack of resources where they won't
be educated or they won't have enough food? You know, sort of a Malthusian view of what would
take place.

013 And the fact that health leads parents to decide, "okay, we don't need to have as many children
because the chance of having the less children being able to survive to be adults and take care of us,

001 **Transcript - Bill Moyers interviews Bill Gates**

002 http://www.pbs.org/now/printable/transcript_gates_print.html

003

004 **MOYERS:** When I first heard that you were going to give away billions of dollars to, global health I was skeptical. I mean, no one can doubt that you know everything there is to know about information technology, but global health? And I thought, here's a man surrounded by power and privilege whose every need and every comfort are met. How could he possibly see the world through the eyes of an impoverished woman with HIV in India or a hungry, starving child in Mozambique? How could he possibly get inside of their way of seeing the world so that what he did wasn't just a rich man's hobby?

005 **GATES:** Certainly I'll never be able to put myself in the situation that people growing up in the less developed countries are in. I've gotten a bit of a sense of it by being out there and meeting people and talking with them. And one of the gentlemen I met with AIDS talked about how he'd been kicked out of where he'd lived and how he felt awful he'd given it to his wife and their struggle to make sure their child didn't have it, and the whole stigma thing, which, you know, that's hard to appreciate. In this country when you get sick people generally reach out, you know, that's the time to help other people and yet some of these diseases it's quite the opposite.

006 So what I was thinking about was where my resources that I'm the steward of be able to make an impact, I thought "okay, what's the greatest inequity left?" And to me, and the more I learned about health and the unbelievable inequity, it kind of stunned me, it shocked me, every step of the way.

007 **MOYERS:** You could have chosen any field, any subject, any issue and poured billions into it and been celebrated. How did you come to this one? To global health?

008 **GATES:** The two areas that are changing in this amazing way are information technology and medical technology. Those are the things that the world will be very different 20 years from now than it is today.

009 I'm so excited about those advances. And they actually feed off of each other. The medical world uses the information tools to do their work. And so when you have those advances you think will they be available to everyone. Will they not just be for the rich world or even just the rich people and the rich world? Will they be for the world at large?

010 The one issue that really grabbed me as urgent were issues related to population... reproductive health.

011 And maybe the most interesting thing I learned is this thing that's still surprising when I tell other people which is that, as you improve health in a society, population growth goes down.

012 You know I thought it was... before I learned about it, I thought it was paradoxical. Well if you improve health, aren't you just dooming people to deal with such a lack of resources where they won't be educated or they won't have enough food? You know, sort of a Malthusian view of what would take place.

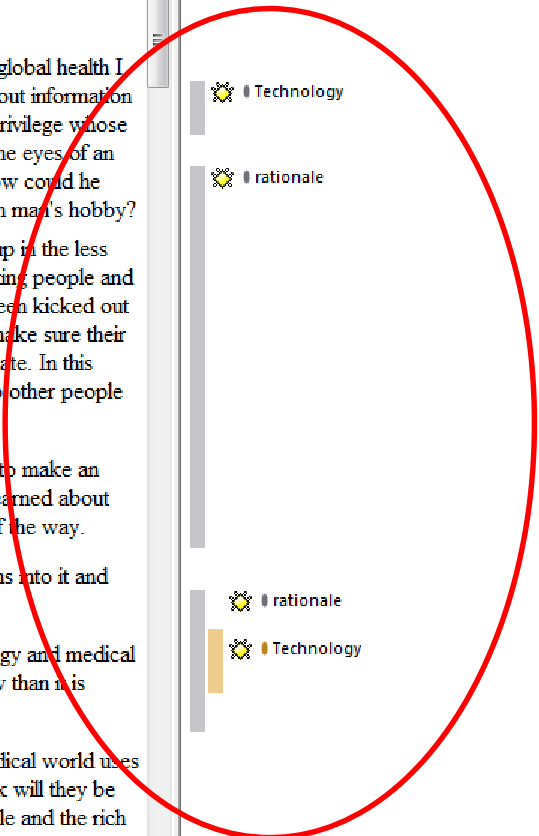

013 And the fact that health leads parents to decide, "okay, we don't need to have as many children because the chance of having the less children being able to survive to be adults and take care of us.

A to je vše přátelé,
tádydádýdádýdadáda...

...a nyní hurá na to,
program na Vás čeká
v místnosti **C51**
