

Syntax

Pavel Caha

13 Sept 2020

Requirements

- ▶ The content of this course: theory of syntax, explained on English (Czech, German)

Requirements

- ▶ The content of this course: theory of syntax, explained on English (Czech, German)
- ▶ You do not need to speak any of the latter languages, English is enough

Requirements

- ▶ The content of this course: theory of syntax, explained on English (Czech, German)
- ▶ You do not need to speak any of the latter languages, English is enough
- ▶ In the end, there will be a test

Requirements

- ▶ The content of this course: theory of syntax, explained on English (Czech, German)
- ▶ You do not need to speak any of the latter languages, English is enough
- ▶ In the end, there will be a test
- ▶ I will ask about terminology: what is head-movement? You tick a-b-c

Requirements

- ▶ The content of this course: theory of syntax, explained on English (Czech, German)
- ▶ You do not need to speak any of the latter languages, English is enough
- ▶ In the end, there will be a test
- ▶ I will ask about terminology: what is head-movement? You tick a-b-c
- ▶ The list of the relevant notions is in the study materials

Requirements

- ▶ The content of this course: theory of syntax, explained on English (Czech, German)
- ▶ You do not need to speak any of the latter languages, English is enough
- ▶ In the end, there will be a test
- ▶ I will ask about terminology: what is head-movement? You tick a-b-c
- ▶ The list of the relevant notions is in the study materials
- ▶ So is the textbook

- ▶ So is the textbook
- ▶ No class on Oct 25 (Oct 28)
- ▶ No class on Nov 15 (Nov 17)

The plan

- ▶ Three large groups of students: Czech language, Computer linguistics, Sign-language linguistics

The plan

- ▶ Three large groups of students: Czech language, Computer linguistics, Sign-language linguistics
- ▶ In the lecture, I go through the theory, the seminar CJJ06 applies this theory to Czech data (Czech language, Computer linguistics)

The plan

- ▶ Three large groups of students: Czech language, Computer linguistics, Sign-language linguistics
- ▶ In the lecture, I go through the theory, the seminar CJJ06 applies this theory to Czech data (Czech language, Computer linguistics)
- ▶ Some of you study sign language – it would be great if you tried to do the same (I am interested in discussion)

The plan

- ▶ Three large groups of students: Czech language, Computer linguistics, Sign-language linguistics
- ▶ In the lecture, I go through the theory, the seminar CJJ06 applies this theory to Czech data (Czech language, Computer linguistics)
- ▶ Some of you study sign language – it would be great if you tried to do the same (I am interested in discussion)
- ▶ Why analyze English? What can we learn about Czech syntax when we analyze English?
 - ▶ The rules of combination are very similar across languages

The plan

- ▶ Three large groups of students: Czech language, Computer linguistics, Sign-language linguistics
- ▶ In the lecture, I go through the theory, the seminar CJJ06 applies this theory to Czech data (Czech language, Computer linguistics)
- ▶ Some of you study sign language – it would be great if you tried to do the same (I am interested in discussion)
- ▶ Why analyze English? What can we learn about Czech syntax when we analyze English?
 - ▶ The rules of combination are very similar across languages
 - ▶ You also understand what differences there are among languages

The plan

- ▶ Three large groups of students: Czech language, Computer linguistics, Sign-language linguistics
- ▶ In the lecture, I go through the theory, the seminar CJJ06 applies this theory to Czech data (Czech language, Computer linguistics)
- ▶ Some of you study sign language – it would be great if you tried to do the same (I am interested in discussion)
- ▶ Why analyze English? What can we learn about Czech syntax when we analyze English?
 - ▶ The rules of combination are very similar across languages
 - ▶ You also understand what differences there are among languages
 - ▶ You are basically forced to apply some abstract tools to concrete examples

The plan

- ▶ Some of you study sign language – it would be great if you tried to do the same (I am interested in discussion)
- ▶ Why analyze English? What can we learn about Czech syntax when we analyze English?
 - ▶ The rules of combination are very similar across languages
 - ▶ You also understand what differences there are among languages
 - ▶ You are basically forced to apply some abstract tools to concrete examples
 - ▶ Give a man a fish and you feed him for a day. Teach a man to fish and you feed him for a lifetime.

The content

- ▶ Syntax is a science that aims to explain how you can make an infinite use of finite means

The content

- ▶ Syntax is a science that aims to explain how you can make an infinite use of finite means
- ▶ (how to put words together)

The content

- ▶ Syntax is a science that aims to explain how you can make an infinite use of finite means
- ▶ (how to put words together)
- ▶ In Czechia, it is customary to analyze syntax using dependency grammar (subject, predicate, adverbial, object, attribute)

The content

- ▶ Syntax is a science that aims to explain how you can make an infinite use of finite means
- ▶ (how to put words together)
- ▶ In Czechia, it is customary to analyze syntax using dependency grammar (subject, predicate, adverbial, object, attribute)
- ▶ We are going to learn phrase-structure grammar (generative grammar, HPSG, LFG)

The content

- ▶ Syntax is a science that aims to explain how you can make an infinite use of finite means
- ▶ (how to put words together)
- ▶ In Czechia, it is customary to analyze syntax using dependency grammar (subject, predicate, adverbial, object, attribute)
- ▶ We are going to learn phrase-structure grammar (generative grammar, HPSG, LFG)
- ▶ Every unit of the dependency-based analysis is also a unit in the phrase-structure tree

The content

- ▶ Syntax is a science that aims to explain how you can make an infinite use of finite means
- ▶ (how to put words together)
- ▶ In Czechia, it is customary to analyze syntax using dependency grammar (subject, predicate, adverbial, object, attribute)
- ▶ We are going to learn phrase-structure grammar (generative grammar, HPSG, LFG)
- ▶ Every unit of the dependency-based analysis is also a unit in the phrase-structure tree
- ▶ Not every unit in a phrase-structure tree is a unit in the dependency tree

The content

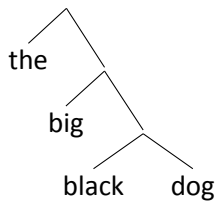

- ▶ Syntax is a science that aims to explain how you can make an infinite use of finite means
 - ▶ (how to put words together)
 - ▶ In Czechia, it is customary to analyze syntax using dependency grammar (subject, predicate, adverbial, object, attribute)

- a. students of Asian history
 - b. history students who happen to be Asian

What is this good for?

My story

- ▶ purely academic: Understanding the nature of language

My story

- ▶ purely academic: Understanding the nature of language
 - ▶ Syntax allows for the infinite use of finite means
 - ▶ It combines smaller units together and constructs larger units
 - ? What are the smallest units?

My story

- ▶ purely academic: Understanding the nature of language
 - ▶ Syntax allows for the infinite use of finite means
 - ▶ It combines smaller units together and constructs larger units
 - ▶ ? What are the smallest units?
 - ▶ Words

My story

- ▶ purely academic: Understanding the nature of language
 - ▶ Syntax allows for the infinite use of finite means
 - ▶ It combines smaller units together and constructs larger units
 - ? What are the smallest units?
 - ▶ Words, morphemes

My story

- ▶ purely academic: Understanding the nature of language
 - ▶ Syntax allows for the infinite use of finite means
 - ▶ It combines smaller units together and constructs larger units
 - ▶ ? What are the smallest units?
 - ▶ Words, morphemes, something much smaller...

The advantages of comparative syntax

(3) SVO vs. SOV

a. (Hans says that) **the dog** **eats** **the bone**

The advantages of comparative syntax

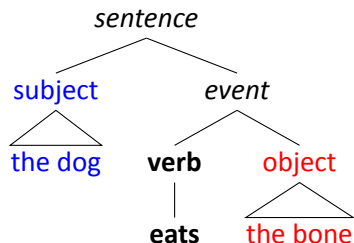

(3) SVO vs. SOV

- a. (Hans says that) **the dog eats the bone**
- b. (Hans sagt dass) **der Hund den Knochen frisst.**
Hans said that the dog the.ACC bone.ACC eats
'(Hans says) that the dog eats the bone.'

The advantages of comparative syntax

(3) SVO vs. SOV

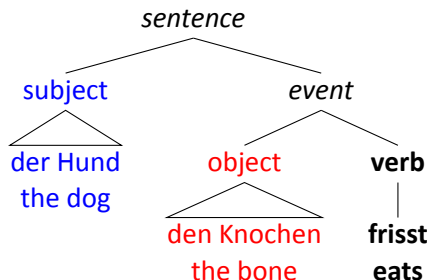

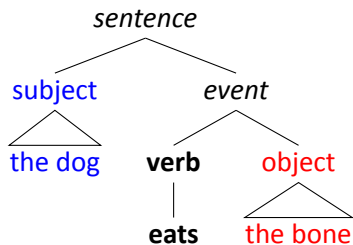

- (Hans says that) **the dog eats the bone**
- (Hans sagt dass) **der Hund den Knochen frisst.**
Hans said that the dog the.ACC bone.ACC eats
'(Hans says) that the dog eats the bone.'

The advantages of comparative syntax
