

THE HISTORY OF Energy Transitions

The economic and technological advances over the last 200 years have transformed how we produce and consume energy.

Here's how the global energy mix has evolved since 1800.

WHAT SCARES THE WORLD

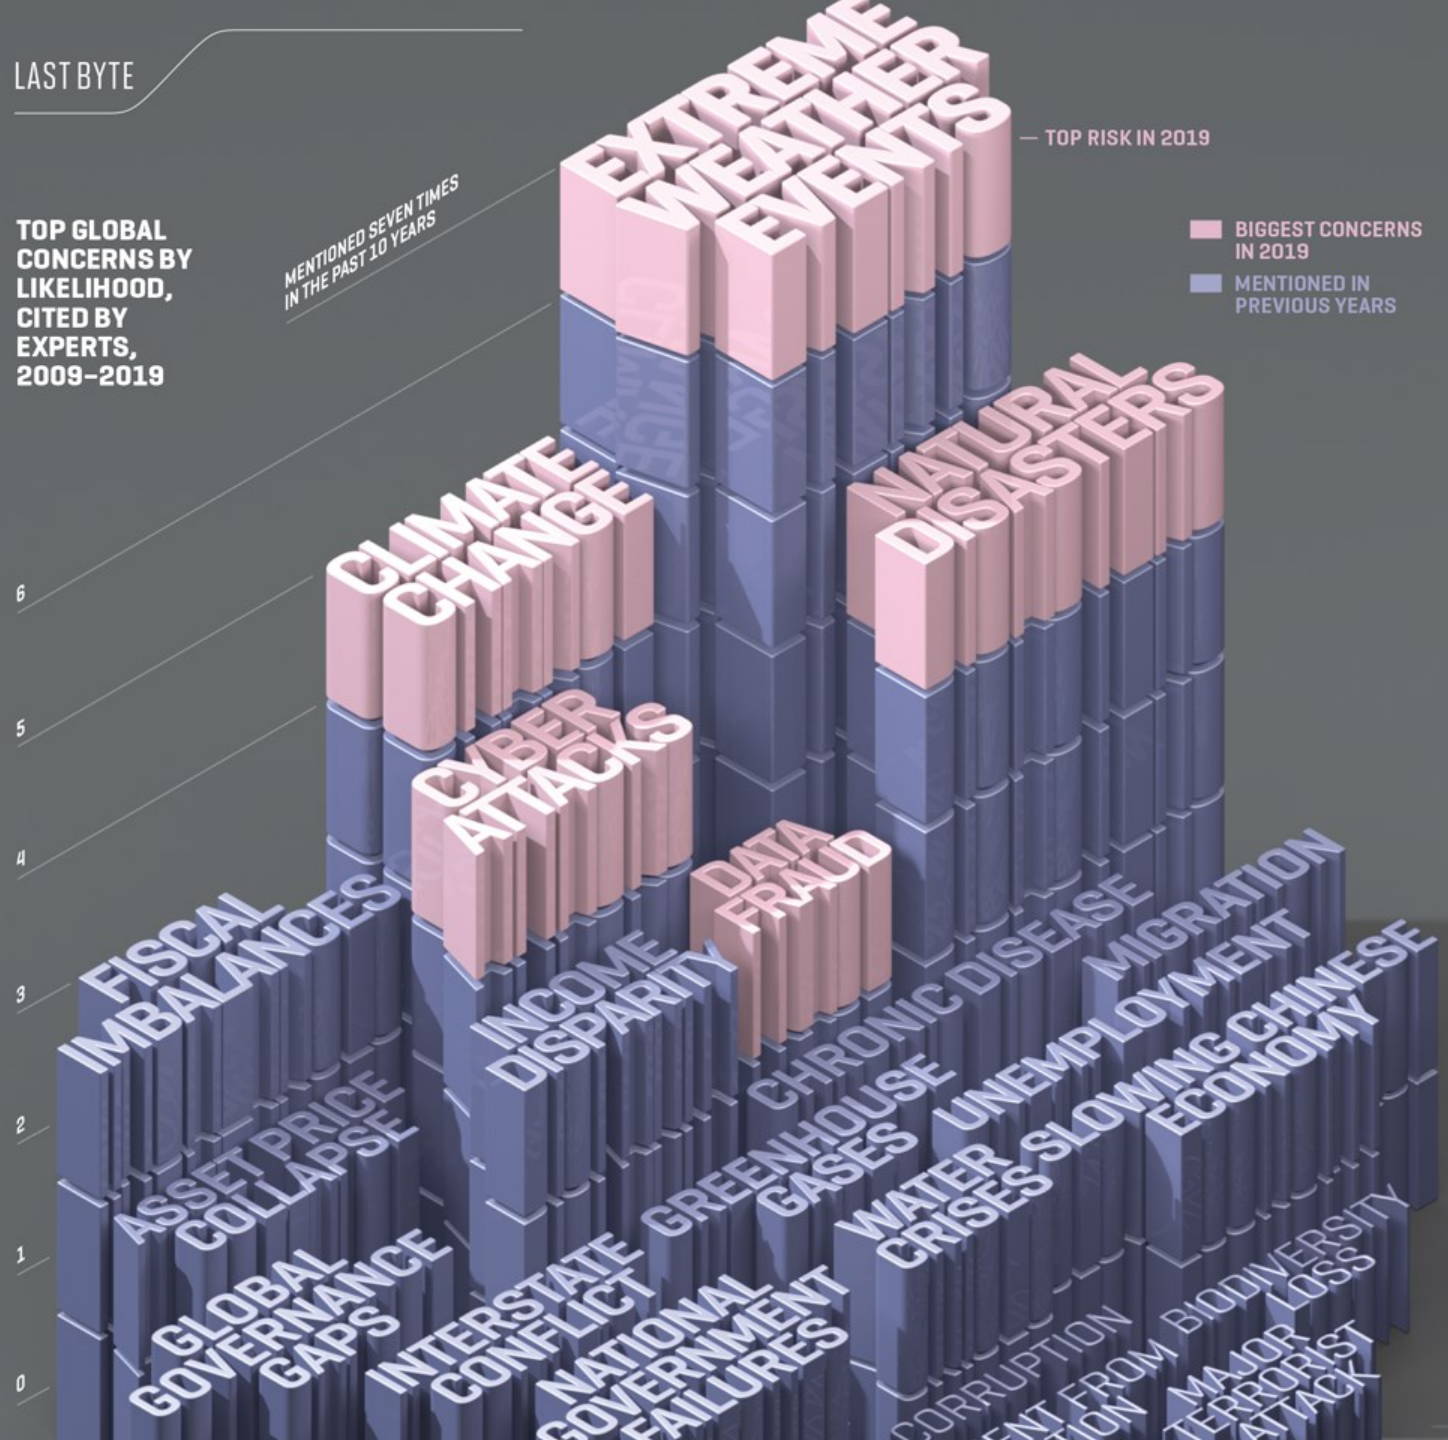

EACH YEAR, THE WORLD ECONOMIC FORUM asks business leaders and other experts which major threats they believe countries are most likely to face in the coming decade. In the latest report, the top three global risks concern the environment and climate change—with destructive weather leading the pack for the third year in a row. For Americans, it seems, that threat is already here. Last year there were 14 weather disasters in the U.S. with losses topping \$1 billion each—from Hurricanes Florence and Michael to the devastating California wildfires. That's more than twice the annual average from 1980 to 2018. —CLIFTON LEAF

Who emits the most CO₂?

Global carbon dioxide (CO₂) emissions were 36.2 billion tonnes in 2017.

Asia
19 billion tonnes CO₂
53% global emissions

North America
6.5 billion tonnes CO₂
18% global emissions

Europe
6.1 billion tonnes CO₂
17% global emissions

Africa
1.3 billion tonnes CO₂
3.7% global emissions

South America
1.1 billion tonnes CO₂
3.2% global emissions

Oceania
0.5 billion tonnes CO₂
1.3% global emissions

Shown are national production-based emissions in 2017. Production-based emissions measure CO₂ produced domestically from fossil fuel combustion and cement, and do not adjust for emissions embedded in trade (i.e. consumption-based).

Figures for the 28 countries in the European Union have been grouped as the 'EU-28' since international targets and negotiations are typically set as a collaborative target between EU countries. Values may not sum to 100% due to rounding.

NATO

vs

RUSSIA

Keeping traditions alive, the world's two largest military superpowers have again locked horns again in 2022.

On the one hand we have NATO led by the US while on the other side we have Russia. The victim this time is Ukraine and the battleground in Europe.

Here is a comparison of the military might of both the sides.
