Culture Medium Kits, Culture Media, Seawater

[Click Here](#) to order.

Culture medium kits have stock solutions for preparing either 20 or 50 liters of culture medium. The 20 liter kits are \$25 each and the 50 liter kits are \$50 each. Kits are immediately available for f/2, K, L1, and DY-V media; kits for other media are available upon request, but the costs may vary. Shipping costs are extra.

We also provide ready-to-use sterile culture medium in 1, 2, 4 and 10 liter volumes, and the costs are \$50, \$80, \$120 and \$250, respectively. The costs are high because we use high quality [Nalgene](#) containers, which can be autoclaved and can be re-used. Shipping costs are extra.

Filtered seawater from Boothbay Harbor is available in 2, 4, 10 and 20 liter volumes, and the costs are \$4.50, \$8, \$16 and \$30, respectively. Shipping costs are extra.

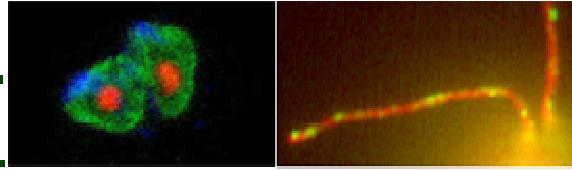

Filtered Sargasso seawater is available at a cost of \$25/liter. Shipping costs are extra.

Shipping Costs

The shipping costs are billed at the exact cost charged to us by the courier. Shipping costs depend largely upon the choice of courier, the destination, and the weight and size of the package.

Chlamy Center

<http://www.chlamy.org/>

This site provides access to Chlamydomonas genomic, genetic and bibliographic information, the Chlamydomonas culture collection, and other resources for the Chlamydomonas community.
