# PhD Position Available in the Laboratory of Cancer Biology

Department of Biology, Faculty of Medicine, Masaryk University

**Mechanisms regulating the function of  
oncoproteins MDM2 and MDMX in cancer cells**

The successful candidate will study:

- MDM2-MDMX interactions and their regulation
- The role of the acidic and RING domains of MDM2 and MDMX in the regulation of p53 tumour suppressor using site-directed mutagenesis
- The function of newly identified protein binding partners for MDM2
