

Exercise 1: Instructions

Given: I have provided two figures showing wireline-log cross sections (two .pdf files): one with three well logs, and one with eleven well logs.

Please print each of these sections on 11 by 17 inch paper (A3). At the beginning of the lecture, I will work with the students/professionals on correlating the key horizons in this field, so that we can evaluate new potential reservoir targets.

Also, please print the PowerPoint Presentation in the Handout Mode, i. e. four figures per page. Print them as black-and-white slides. These include most of the slides that I will use to lecture.

If possible, please distribute the PowerPoint handouts after we do the interpretation.
