

Presentation Feedback

1. Do not read from visuals – use notes to assist your memory)
2. Do not put too much text on visuals - use just key words
3. If you use graphs, explain what they show, refer to them
4. Interpret data
5. Watch timing
6. Finish with a summary – take home message
7. Give sources
8. Stress how you contributed to the topic
9. It is good when your introduction is personal
10. Establish a good contact with your audience – ask questions
11. In a pair presentation, cooperate effectively

Pronunciation of key words

determine model modelling

derive symmetrical logistic variable
