

## **Macedonian steppe**

Information from Dr. Renata Čušterevska, Ss. Cyril and Methodius University, Skopje

I suggest you go to the Ovce Pole railway station ( 41.805194° 22.009666°), where you can see very rare Halophytic communities, and you can see steppe vegetation in the direction of the village Bogoslovec (41.774540° 22.020794°).

### **halophytic vegetation**

Thero-Salicornietea Tx. in Tx. et Oberd. 1958

Thero-Salicornietalia Pignatti 1952

Thero-Salicornion(Br.-Bl. 1933) Pignatti 1953
