# Contents

<b>Acknowledgements</b>	x
<b>Introduction</b>	1
 Herbaria of the world	2
Functions of herbaria	2
Different types of herbaria	3
Specialised collections within herbaria	3
How this book is arranged	4
 <b>CHAPTER 1</b>	
<b>Herbarium Collections</b>	5
 Types of collections	6
Main collection	6
Carpological collection	6
Bulky specimens	6
Xylarium	6
Bryophytes and lichens	7
Macrofungi	7
Fossils	7
Spirit collection	7
Illustrations, photographs, and copies of specimens	7
Microscope slides	8
Expanding the collections	8
Plant collecting	8
Gifts	8
Deposits	8
Exchanges	8
 <b>CHAPTER 2</b>	
<b>Collecting Plants</b>	9
 Collectors	10
Professionals	10
Amateur collectors and parataxonomists	10
Students	10
Types of collecting	10
Research or specialised collecting	10
Floristic collecting	10
What you need	10
Collecting equipment	12
Collecting permits	14
Special permits	14
Vehicle maintenance	14
Emergency supplies	14
Maps and map reading	15
Global Positioning Systems	15
What to collect	16
Dealing with collected material in the field	17
Bryophytes and lichens	17
How to collect bryophytes and lichens	17

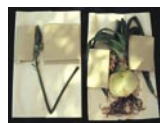

Recording information	18
Basic label information	18

## CHAPTER 3

### Pressing and Drying

Main aims	19
The plant press	20
Components of a plant press	20
How to pack a plant press step by step	21
Standard pressing methods	21
Special pressing methods	23
Succulent and fleshy plants	23
Graminoids	23
Fleshy underground organs	23
Spiny plants	24
Fragile flowers	24
Fixatives and preservatives	26
Fungi	28
Aquatic plants	28
Submerged plants	28
Drying specimens	30

## CHAPTER 4

### Mounting Specimens

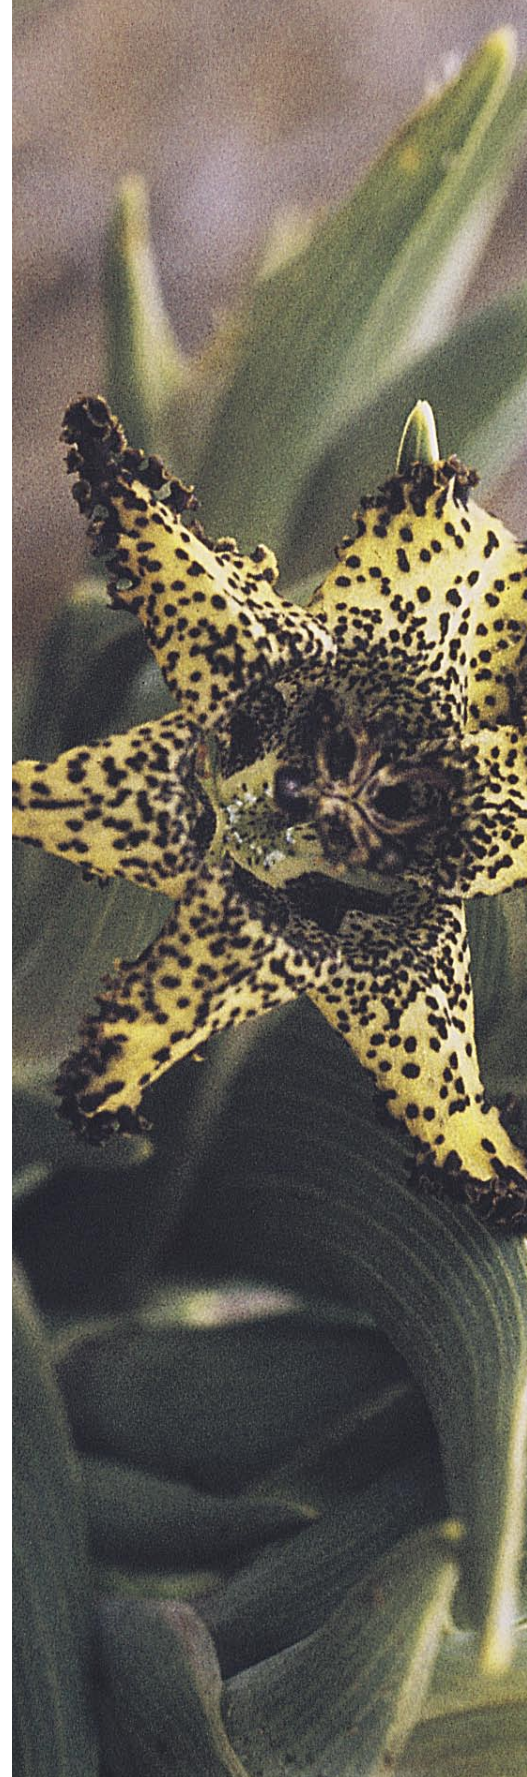

Main aims	31
Material and equipment	32
Mounting procedures	32
Arranging the specimen	32
Envelopes	33
Glueing	33
Strapping	36
Stitching	36
Mounting labels	36
Preparing bryophytes and lichens for storage	38

## CHAPTER 5

### Physical Curation

Storing specimens	39
Species covers	40
Type covers	40
Genus covers	40
Guidelines for handling specimens	41
Labelling specimens	42
Producing labels	43
Accession numbers	43
Filing specimens	43
Alphabetical arrangement	43
Systematic arrangement	43
Further subdivisions	43
Indexes and cupboard lists	43
How to arrange specimens	44
Quick Guides	45
How to compile a Quick Guide	45

Computerisation	45
Advantages	45
Disadvantages	46
The precis system	46
Geographical Information Systems	46
Data input	47
Data output	48
System maintenance	48
Loans	49
Selecting specimens to send out on loan	49
Handling requests for loans	49
Requesting loans	49
How to re-file returned loans	59
Removing samples from specimens	59
Remounting and repairing specimens	60
Duplicates	60

## CHAPTER 6

### Herbarium Pests

Preventing insect damage	61
Freezing	62
Microwaving	62
Living plants	62
Monitoring	62
Humidity control	63
How to prevent insect infestations	63
Treating infestations	63
Fumigation	63
Localised treatment	63
Methods not recommended	64

## CHAPTER 7

### Scientific Curation

Taxonomy and nomenclature	65
Rules for naming plants	66
Plant names	66
Authors	66
Type specimens	68
Descriptions	68
Taxonomic publications	68
Identifying specimens	68
Equipment and materials	68
How to identify a specimen using a key	69
How to identify a specimen by matching	70
Library and literature	70
Recommended herbarium literature	70
Incorporating new research	72
How to evaluate taxonomic revisions	72
How to incorporate a taxonomic revision	72

## CHAPTER 8

### Starting a New Herbarium

Purpose	73
Collecting, preserving and storing specimens	74
Identification	74
Nomenclature	74
Comprehensive data-bank	74
Determining basic needs	74
Registering in Index Herbariorum	74
Infrastructure and functional areas	74
Buildings	74
Working areas, storage space, and offices	75
Cupboards	75
Lighting	75
Ventilation	75
Telecommunications	75
Library	76
Laboratory	76
Reception	76
Equipment and supplies	76
Decontamination equipment	76
Plant dryers	76
Magnifying instruments	76
Maps	77
Camera	77
Other equipment	78
Herbarium services	78
Information service	78
Visitors	78
Plant identifications	78
Loans	79
Environmental Impact Assessments	79
Herbarium management	79
Staff management	79
Herbarium staff	79
Financial management	80

## APPENDIX 1

Herbarium Supplies	81
Local suppliers	81
International suppliers	81

## Acknowledgements

Many of the notes used to compile this guide are not new. We would like to acknowledge all NBI staff members who have been involved in some way or another in developing notes on herbarium practice and techniques.

We are grateful, in particular, to René Glen for the valuable information on collecting aquatic plants, Jacques van Rooy for information on collecting and caring for bryophytes, and Priscilla Burgoyne for demonstrating the gummed card method of preserving fragile flowers. Braam van Wyk of the H.W.G.J. Schweickerdt Herbarium at the University of Pretoria assisted with taxonomic definitions.

The artists, photographers, and models are thanked for their time and willingness to participate.

We also thank Lidia Gibson and Hanlie van Heerden for spending many hours editing and polishing the text, Antoinette Burkhardt and Vanilla Design Studio for their input in creating this user-friendly book, and SABONET for affording us the opportunity to publish this manual.

Collections made during an expedition in the field.
