

# Syllabus Bi7290en- Human Genetics and Genomics Seminar

You are supposed to choose an interesting online presentation from top class scientist and prepare a session for other students.

Each session has 3 parts

- a) introduction into the topic and key information about author of the presentation (15 mins)
- b) presentation – at least 30 min online presentation from high level scientist taken from f.e. ESHG, ASHG (available at YouTube) or commercial videos
- c) discussion about the given topics (15 mins or more)

For terms of your session please visit
