

Academic Writing in Practice

Mgr. David Konecny / RECETOX

Course mission

- **The course is designed to provide participants with theoretical insight and practical skills essential for the successful publication of research papers in their field.**
- In addition to regular course sessions, participants will take part in hands-on consultations of their work-in-progress texts in order to submit a finalized manuscript for publication by the end of the course.

Course objectives

- **To ideally produce a final draft of your academic text**
- To provide you with a better overall understanding of academic writing processes
- To enhance your writing skills through practical application
- To select viable candidates for a core RECETOX writing team
- To help develop a full-scale academic writing course at the Faculty of Medicine/Science, specifically reflecting the needs of students and academics working in the theoretical life sciences

Introduce yourself

- Current position, focus, interests, etc.
- Publication experience
- **Current work**
 - **Introduce your work-in-progress manuscript**
