### .: Taxonomic Literature II (TL-2)

**Taxonomic Literature: A selective guide to botanical publications and collections with dates, commentaries and types (Stafleu et al.).**

TL-2 is the premier publication of the International Association for Plant Taxonomy (IAPT) and this online version was made possible by the generous cooperation of the IAPT.

In its print form, TL-2 is a 15 volume guide to the literature of systematic botany published between 1753 and 1940. It is organized by author and includes numbered entries for the author's publications. Suggested abbreviations for use in taxonomic publications are provided: abbreviations for the author's name, short titles and abbreviations of the short titles for publications. TL-2 is the standard by which authors' names and titles should be abbreviated.

**TL-2 at the Smithsonian Institution Libraries**

Currently, we offer a basic database searchable by keyword, author name, title number, author name abbreviation, or title abbreviation. We display the search results with the scanned page and the parallel OCRred and corrected text in a "page turning" application.

The next round of planned improvements, to be done in conjunction with the redesign of the Smithsonian Libraries' website, is to implement Linked Open Data for the entire TL-2 dataset. This computer-friendly format will give each authors and publications a permanent, authoritative URI on the web. These URIs will contain information in both human-readable form (via HTML) and computer-readable form (via RDF/XML.) A SPARQL endpoint will also be provided for querying the linked data.

Further in the future, we wish to perform additional parsing of the data to, for example, extract the Herbaria that contain specimens collected by the authors, link authors and publications to other sources on the web such as the [Virtual International Authority File](#), the [Biodiversity Heritage Library](#), and the [Encyclopedia of Life](#).

Funding for this online version by the Atherton Seidell Endowment Fund of the Smithsonian Institution.

# Nomenklatura – typové položky?

<http://ww2.bgbm.org/herbarium/>

The screenshot shows the homepage of the Herbarium Berolinense Virtual Herbarium. The browser address bar displays [ww2.bgbm.org/herbarium/](http://ww2.bgbm.org/herbarium/). The page features a navigation menu with links for VISIT US, WHAT'S ON, THE GARDEN, THE MUSEUM, and SCIENCE. A large banner image shows a greenhouse and a plant. Below the banner, there is a section titled "Search digital specimens at the Herbarium Berolinense" with a sidebar containing links for "Digital Imaging at B", "Equipment and process", "How to cite this site", "Copyright", and "Barcodes at B". The main content area includes a search form with fields for Family, Scientific name, Collector, Collector number, Country, and Subcollection, along with checkboxes for "Types only" and "Images only". A "Search" button is located at the bottom of the form. A note at the bottom of the page states: "Currently, as a rule only basic information is captured in textual form, i.e. the barcode, the scientific name under which the specimen is stored, the modern country of origin (where it can be easily deduced), and the original designation of the collection site."

The screenshot shows the specimen page for *Cirsium haussknechtii* in the Herbarium Berolinense Virtual Herbarium. The browser address bar displays [ww2.bgbm.org/herbarium/result.cfm?searchart](http://ww2.bgbm.org/herbarium/result.cfm?searchart). The page features a navigation menu with links for VISIT US, WHAT'S ON, THE GARDEN, THE MUSEUM, and SCIENCE. A large banner image shows a greenhouse and a plant. Below the banner, there is a section titled "Digital Imaging at B" with a sidebar containing links for "Equipment and process", "How to cite this site", "Copyright", and "Barcodes at B". The main content area includes a search bar, a "New search" button, and a "Hits: 28" indicator. The specimen details are listed as follows:

- Stable Identifier:** <https://herbarium.bgbm.org/object/B100367969>
- Barcode:** B 10 0367969
- Family:** ASTERACEAE
- Storage name:** *Cirsium haussknechtii* Boiss.
- Type status:** type
- Collection:** Iran, Islamic Republic of. Persica occidentalis: (Sultanabad) ad Gindi. 1889-08-01, Leg.: Strauss, T. s.n.

A photograph of the dried plant specimen is shown on the right side of the page.

Search Reset

Last database update 2021-05-04

### Search Tips

**general**  
search is not case sensitive  
fields are automatically linked by AND  
for partial strings the % sign can be used as a wildcard

**taxon search**  
queries for a genus can be sent as "genus name" "blank space" and the "%":  
searchstring "Oncidium %" yields all data for Oncidium plus all data for transferred names, e.g. Cyrtorchilum, etc.  
typing the initial letters for "genus" and "epithet" are sufficient as search criteria:  
"p bad" yields all taxa where genus starts with "p" and epithet starts with "bad" results include e.g. *Parmelia badia* Hepp, *Peziza badia* Pers. or *Poa badensis* Haenke ex Willd.

search on synonymy has been implemented for nomenclatural & taxonomic questions / for this purpose the "incl. syn." checkbox is activate as a standard; if you want to get data for the exact search string uncheck "incl. syn."

**images**  
 image(s) provided for living plant ||  observational record; without specimen or image  
 image(s) provided for herbarium specimen ||  images provided for specimen and living plant

## EURO+MED PlantBase

### The Euro+Med PlantBase - the information resource for Euro-Mediterranean plant diversity

Euro+Med Plantbase integrates and critically evaluates information from Flora Europaea, Med-Checklist, the Flora of Macaronesia, and from regional and national floras and checklists from the area as well as additional taxonomic and floristic literature. This is complemented by the European taxa of several families taken from the World Checklist of Selected Plant Families and of the Leguminosae from the International Legume Database and Information Service ILDIS (see [credits](#) for details). By 1st of February 2018 it provides access to the total European flora of vascular plants in **222 plant families**.

iNaturalist je společná iniciativa Kalifornské akademie věd a Národní geografické společnosti.

## Jak to funguje

1

Zaznamenejte své pozorování

2

Sdílejte s našimi přírodovědci

3

Diskutujte o svých nálezech

Classification

Kingdom: **Plantae**

Phylum: **Tracheophyta**

Class: **Magnoliopsida**

Order: **Asterales**

Family: **Asteraceae**

Genus: **Onopordum L.**

Species: **Onopordum acaulon L.**

Synonym: **Cirsium acaulon (L.) Scop.**

No children

**SPECIES | HOMOTYPIC SYNONYM**

### *Cirsium acaulon* (L.) Scop.

Published in: 131, 1772 source: World Register of Marine Species

Homotypic synonym of *Onopordum acaulon* L.
