

The background is a dark blue gradient with a subtle pattern of white dots. On the left side, there are several overlapping circular elements. A prominent one is a large circle with a scale around its perimeter, marked with numbers from 140 to 260 in increments of 10. Other circles are partially visible, some with dashed lines and arrows, suggesting a technical or scientific theme.

CHATGPT JAKO KAMARÁD

Hello. I feel sad. Can you help me?

Hello. I'm sorry to hear that you're feeling sad. As an AI language model, I'm here to listen and offer support. If you'd like to talk about what's been bothering you, I'm here to listen.

I just had a really bad day at work.

CHATGPT JAKO KAMARÁD

JU

I just had a really bad day at work.

I'm sorry to hear that you had a bad day at work. It can be tough when work gets overwhelming or stressful. Would you like to talk about what happened and how you're feeling? Sometimes it can help to process and talk about our experiences.

JU

I work in a lab and I was doing some sample prep... and I added the wrong standards to all of my samples. I'm afraid my boss will fire me!

CHATGPT JAKO KAMARÁD

I can understand why you might be feeling anxious and worried about the mistake you made at work. However, it's important to remember that mistakes are a natural part of the learning process and everyone makes them. It's also important to take responsibility for our mistakes and take steps to address and prevent them in the future.

One thing you can do is talk to your boss or a supervisor about what happened and see if there are any ways to mitigate the mistake or fix it. Be honest and transparent about what happened and what you're doing to prevent it from happening again. This shows that you're taking the mistake seriously and that you're willing to take steps to correct it.

Remember that making mistakes does not define your worth as a person or as an employee. We all make mistakes, and what's important is how we respond to them and learn from them.

CHATGPT JAKO KAMARÁD

I feel better already. Thank you!

You're very welcome! I'm glad I could offer some support and help you feel a little better. Remember to be kind to yourself and take care of your well-being. If you ever need someone to talk to, don't hesitate to reach out again.

 JU How is queen Elizabeth?

 As an AI language model, I don't have access to real-time information, but as of my knowledge cutoff date of September 2021, Queen Elizabeth II was 95 years old and still serving as the reigning monarch of the United Kingdom.  

- Mít názor

 JU Why was Donald Trump such a sh:it president?

 As an AI language model, I strive to remain impartial and provide informative answers without expressing personal opinions or biases. It's worth noting that opinions about Donald Trump's presidency are varied and can differ depending on political beliefs and values. Ultimately, it's up to individuals to form their own opinions based on their own research and critical thinking.  

CO TO NEUMÍ

- Myslet

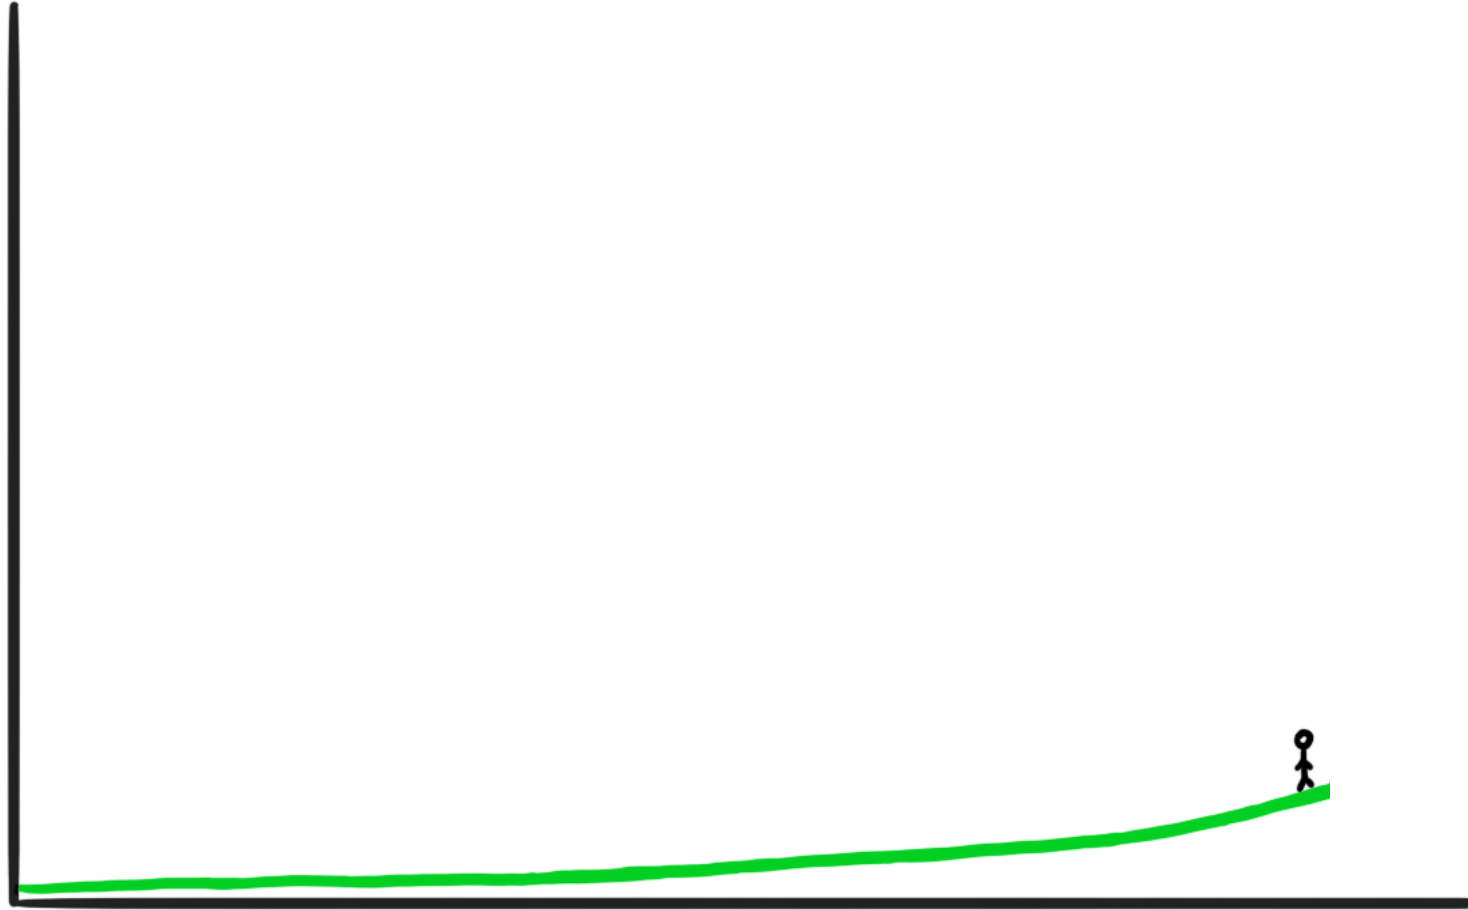

“It is important to be careful about making statements that begin with **‘it is,’** because these statements can be perceived as definitive and unassailable. It is always better to qualify your statements, and to be open to other perspectives and opinions.
