

THE ELEMENTS!

Hot seat

Get ready to play

- Divide into two groups
- Brainstorm the names of chemical elements you learned last semester
- Decide who will be the guesser for each team
- Each team receives 7 symbols of elements while the guesser's back is turned away
- The team gives clues about the element without mentioning its name or symbol of the element so that the guesser gets it and says the name out loud
- The team that guesses more elements correctly or can do so in the shortest time, wins

TEAM A
