

WATER - Earth Science, Addison-Wesley (AW)

The Earth's Fresh Water (Chapter 7)

Section 1 Water on the Ground

Water collects on the ground

Water runs off the ground

Section 2 Water in the Ground

Water soaks into the ground - Porosity and permeability

Water comes out of the ground

The Earth's Fresh Water – Revision test

THE OCEAN (Chapter 8)

Section 1 The Bottom of the Ocean

Sounding the ocean bottom

The topography of the ocean bottom

Resources of the ocean bottom

Section 2 Properties of Ocean Water

Salinity

Temperature and density

Sea ice

Water absorbs light

Water pressure

Resources of ocean water

Section 3 The Circulation of Ocean Water

Directions of motion in a wave

The beginning, middle, and end of a wave

Effects of wave action

Tides

Deep ocean circulation

Ocean – Revision Test
