

AbCheck specializes in the discovery and development of novel human high affinity antibodies for human health care. The company's service portfolio covers all aspects of antibody discovery, from early stage research to lead optimization. We are positioned as a one-stop-shop partner for antibody research, offering a complete package of discovery services and capabilities. Existing since 2009, AbCheck is well accepted as service provider offering the isolation of human antibodies for Biotech and Pharma.

We are looking for

Research Assistants

to join our team in Plzen, Czech Republic. We offer the possibility to learn state of the art methods used in today's laboratory practice including gene technology, expression of recombinant proteins in bacteria and eukaryotic cells, phage and yeast display and methods for antibody characterization combined with a competitive salary.

Our Requirements:

- Education as Biological/Medical assistants or Bachelor in Biology, Biochemistry or Biotechnology
- Experience with handling of genetically modified organisms (GMOs) is preferred
- Skills in molecular biology is a plus
- Experience in production and purification of recombinant proteins is appreciated
- Basic knowledge of English language

How to apply:

Please send your English application including a CV preferably via E-Mail to Hana Čechurová (h.cechurova@abcheck.eu) or Veronika Soukupová (v.soukupova@abcheck.eu).
