Map of the 16 Mediterranean Ecologically or Biologically Significant Areas (EBSAs) adopted by the 12th meeting of the Conference of the Parties to the Convention on Biological Diversity (CBD), (October 2014; Pyeongchang, Republic of Korea). They were chosen among the 17 ones defined by a regional workshop held jointly by the CBD and the Barcelona Convention for the Protection of the Marine Environment and the Coastal Region of the Mediterranean (April 2014; Malaga, Spain).

They are the result of works started in 2008 by the Parties to the SPA/BD Protocol of the Barcelona Convention, which prepared already in 2010 a draft list of Mediterranean areas following the EBSA criteria for the 17th Ordinary Meeting of the Contracting Parties to the Barcelona Convention (February 2012; Paris, France). The 2010 draft list was presented by the Barcelona Convention Secretariat to the 11th meeting of the Conference of the Parties to the Convention on Biological Diversity (October 2012; Hyderabad, India) where the celebration of the 2014 workshop CBD-Barcelona Convention to jointly sharpen up the definition of Mediterranean EBSAs was recommended.
