Le Corbusier

The 1933 rendering of Plan Chandigarh demonstrates Le Corbusier's superimposition of modern forms: the long arching roadway that includes housing; his viaduct city-connecting central Chandigarh to its suburbs and the curvilinear complex of housing in the heights that accesses the waterfront business district via an elevated highway bypassing the Casbah.

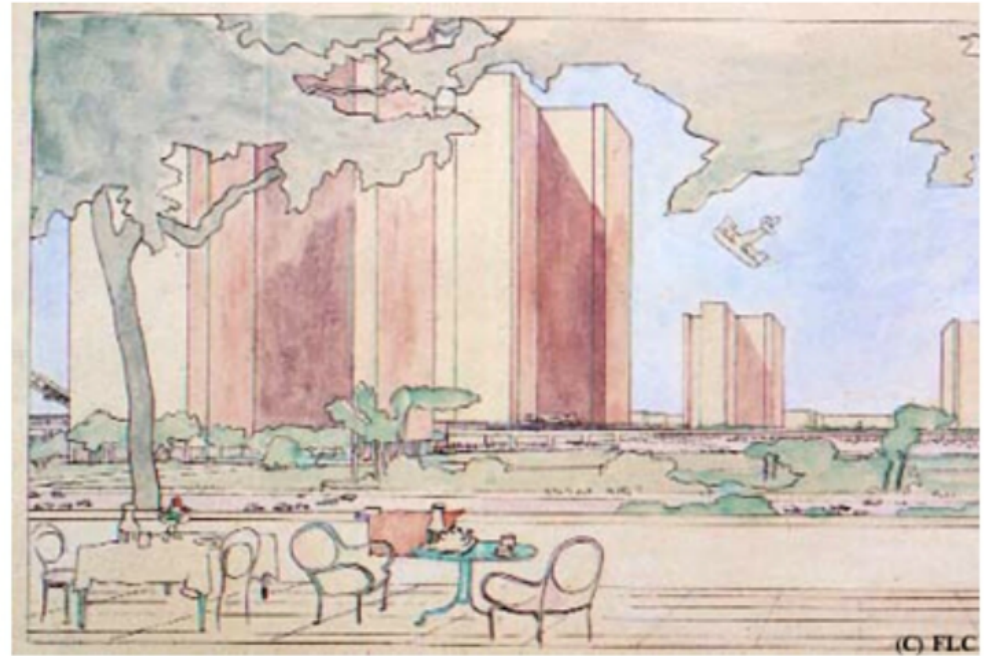

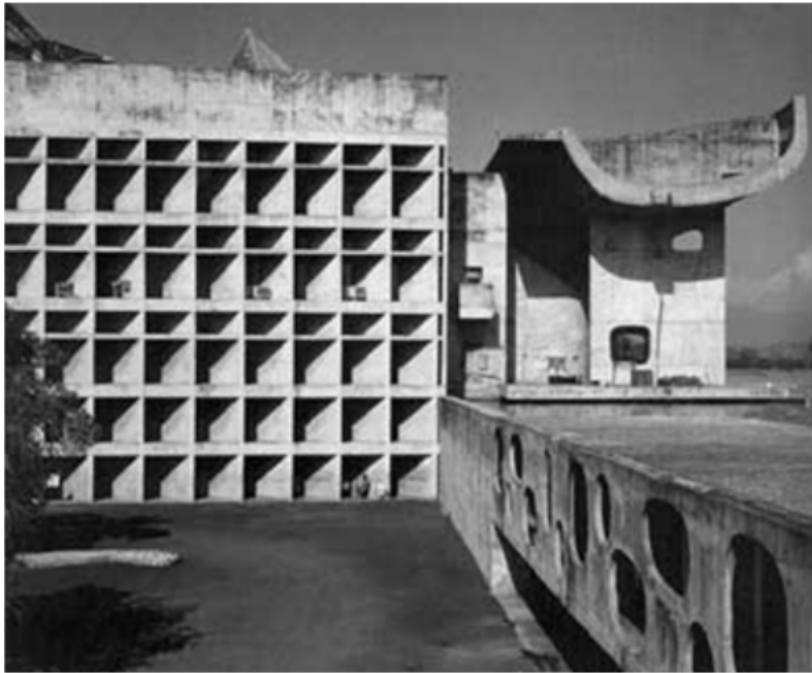

LE CORBUSIER, 1923. A CITY OF TOWERS

The towers are placed amidst gardens and playing-fields. The main arteries, with their motor-tracks built over them, allow of easy, or rapid, or very rapid circulation of traffic.

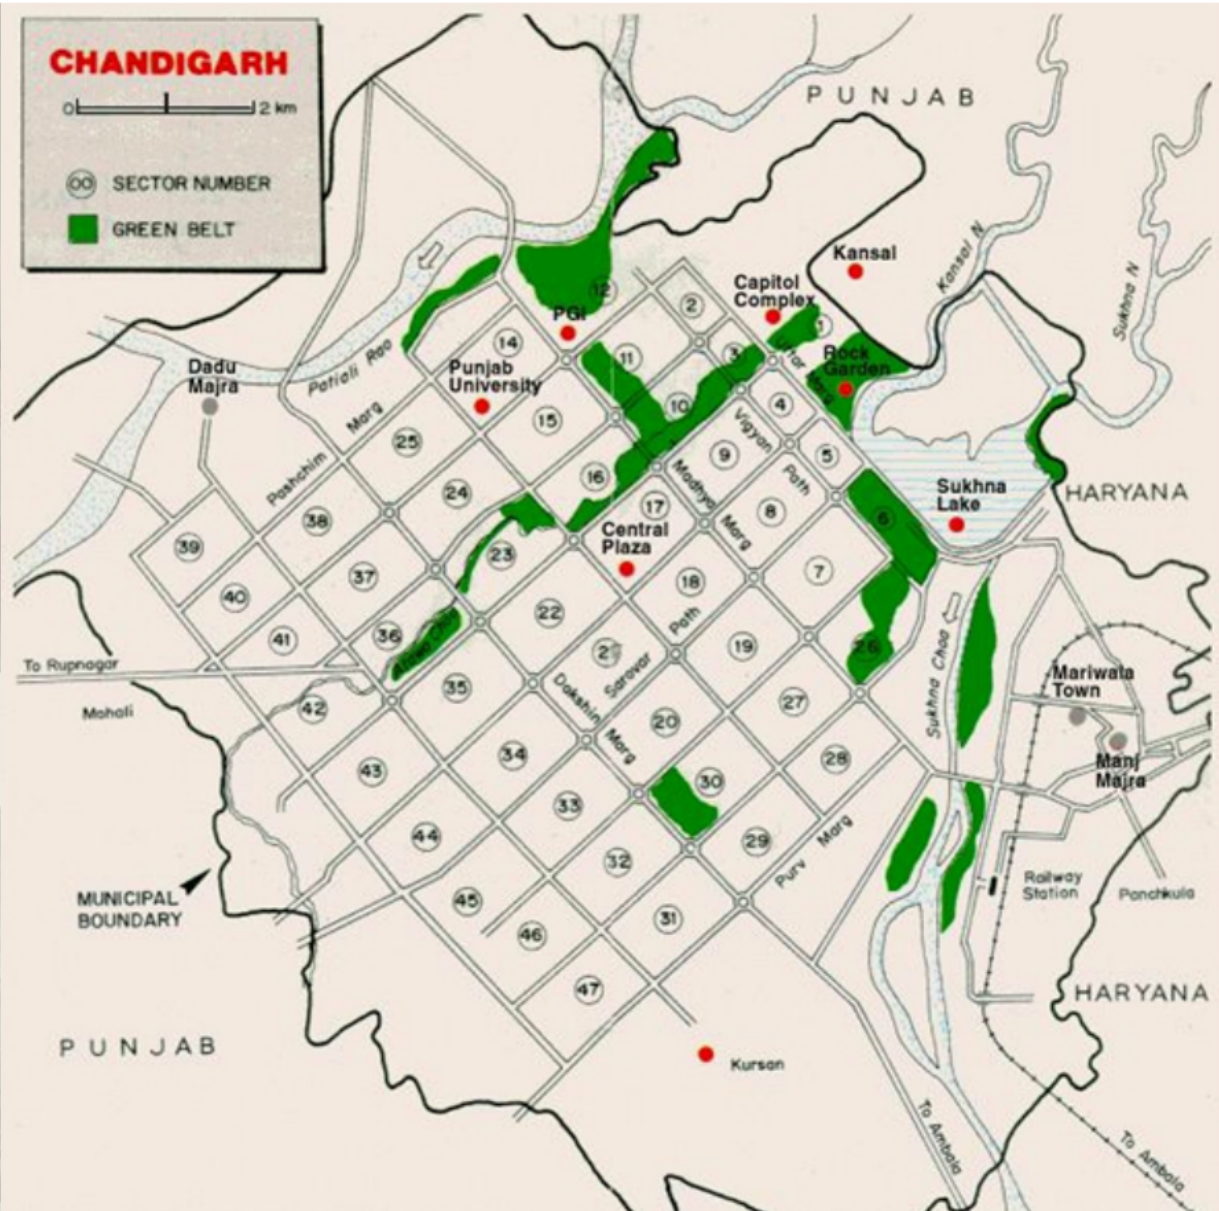

The 1933 rendering of Plan Obus for Algiers demonstrates Le Corbusier's superimposition of modern forms: the long arching roadway that includes housing-his viaduct city-connecting central Algiers to its suburbs and the curvilinear complex of housing in the heights that accesses the waterfront business district via an elevated highway bypassing the Casbah.
