

A beamer theme for the typesetting of presentations at the Masaryk University, Brno

Vít Novotný, Aleš Křenek

May 16, 2020

Abstract

This document details the design and the implementation of the mubeamer theme for the beamer $\LaTeX 2_{\epsilon}$ class [1]. The theme is intended to be used across the Masaryk University in Brno and is loosely based on a theme developed by Aleš Křenek for the Institute of Computer Science at the Masaryk University in Brno¹. Included is technical documentation for anyone who wishes to modify the class as well as information on the basic usage for the ordinary user.

```
1 \NeedsTeXFormat{LaTeX2e}
2 \ProvidesPackage{beamerthemeMU}[2020/05/16]
3 \mode<presentation>
```

2	The impact of optical scaling on the readability of small text	7

1 Requirements

1.1 Required T_EX Engine

Mubeamer should work out-of-box with all conventional T_EX engines (T_EX, ϵ -T_EX, pdfT_EX, LuaT_EX, Xe_LA_TE_X) in PDF mode.

1.2 Required Packages

Mubeamer requires the etoolbox package to patch the `\includegraphics` command in section 4.

```
4 \RequirePackage{etoolbox}
```

Optional packages include font packages as documented in section 3.2.

2 Basic Usage

To use mubeamer, specify `\usetheme[options]{MU}` in the preamble of your beamer document; the available *options* are documented in section 3. Inside your document, you can use the standard markup provided by the L^AT_EX beamer class [1]. To get started quickly, inspect the example files distributed alongside mubeamer.

3 Package Options

3.1 Defining the Options

<code>\mubeamer@option@locale</code>	<p>The <code>locale=<i><language name></i></code> specifies the language that will determine which logos and labels are displayed. <i>When the locale option is unspecified, the main language of the babel and polyglossia packages is used. If neither package is available, locale=english is used.</i></p> <pre>5 \DeclareOptionBeamer{locale}{\def\mubeamer@option@locale{#1}} 6 \ExecuteOptionsBeamer{locale=% 7 \ifundefined{language}{english}{\language}}}</pre>
<code>\mubeamer@option@workplace</code>	<p>The <code>workplace=<i><work place></i></code> specifies the work place whose logos and labels that will be displayed. The <i><work place></i>s recognized at the Masaryk University in Brno are outlined in table 1. <i>When the workplace option is unspecified, workplace=mu is used.</i></p> <pre>8 \DeclareOptionBeamer{workplace}{\def\mubeamer@option@workplace{#1}} 9 \ExecuteOptionsBeamer{workplace=mu}</pre>
<code>\ifmubeamer@option@fonts</code> <code>\ifmubeamer@option@scaling</code>	<p>The <code>fonts=<i><regime></i></code> option specifies how mubeamer sets up the default font families. The following <i><regime></i>s are recognized:</p> <ul style="list-style-type: none">• <code>fonts=none</code> will make no changes to the currently set up font families.• <code>fonts=basic</code> will make the PT Sans and PT Mono font families [2] the default sans-serif and monospace font families.• <code>fonts=scaled</code> is the default option when the fonts option is unspecified. Like <code>fonts=basic</code>, the scaled <i><regime></i> will make PT Sans and PT Mono the default sans-serif and monospace font families. On top of that, the PT Sans Caption font family will become the default sans-serif family at small font sizes to improve readability; the mechanism is documented in section 3.2. <pre>10 \newif\ifmubeamer@option@fonts 11 \newif\ifmubeamer@option@scaling 12 \def\mubeamer@temp@option@fonts@none{none} 13 \def\mubeamer@temp@option@fonts@basic{basic} 14 \def\mubeamer@temp@option@fonts@scaled{scaled} 15 \DeclareOptionBeamer{fonts}{% 16 \def\mubeamer@temp@option@arg{#1}% 17 \ifx\mubeamer@temp@option@arg\mubeamer@temp@option@fonts@none 18 \mubeamer@option@fontfalse 19 \mubeamer@option@scalingfalse 20 \else 21 \ifx\mubeamer@temp@option@arg\mubeamer@temp@option@fonts@basic 22 \mubeamer@option@fontstrue 23 \mubeamer@option@scalingfalse 24 \else 25 \ifx\mubeamer@temp@option@arg\mubeamer@temp@option@fonts@scaled</pre>

Table 1: The work places recognized at the Masaryk University in Brno

```

26     \mubeamer@option@fontstrue
27     \mubeamer@option@scalingtrue
28   \else
29     \PackageError{beamerthemeMU}%
30       {fonts=#1 is not a valid option}%
31       {fonts={none|basic|scaled} are the only valid options}%
32   \fi
33 \fi
34 \fi
35 }
36 \ExecuteOptionsBeamer{fonts=scaled}

```

`\ifmubeamer@option@gray` The gray option makes all logos and labels gray, whereas the color option makes them colored. *The color option is the default when neither option is specified.*

```

37 \newif\ifmubeamer@option@gray
38 \DeclareOptionBeamer{gray}{\mubeamer@option@graytrue}
39 \DeclareOptionBeamer{color}{\mubeamer@option@grayfalse}
40 \ExecuteOptionsBeamer{color}

```

3.2 Processing the Options

```
41 \ProcessOptionsBeamer
```

If the `fonts=basic` or the `fonts=scaled` option is specified, we load the `PTSans` and `PTMono` packages. This will make the PT Sans and PT Mono font families the default sans-serif and monospace font families. Since the packages do not handle font selection for $X_{\text{E}}\text{TeX}$ and LuaTeX , we load the fonts manually in these TeX engines using commands from the `fontspec` package, which we assume the user has already loaded themselves.

`\ifmubeamer@scaling@enabled`
`\mubeamer@scaling@family@basic`
`\mubeamer@scaling@family@caption`
`\mubeamer@scaling@apply`

If the `fonts=scaled` option is specified, we will load the `PTSansCaption` package and we patch the $\text{L}^{\text{A}}\text{TeX}$ font size commands, so that switching to `\scriptsize` and below will:

- change the default sans-serif family to PT Sans Caption if PT Sans is the current default sans-serif family, and
- change the current font family to PT Sans Caption if PT Sans is the current font family.

Switching to `\small` and above will do the reverse.

```

42 \ifmubeamer@option@scaling
43   \RequirePackage{PTSansCaption}
44   \@ifpackageloaded{fontspec}{
45     \begingroup
46     \newfontfamily\mubeamer@temp@fontname
47       [NFSSFamily=PTSansCaption-TLF]{PT Sans Caption}
48   \endgroup
49   }{}
50 \fi

```

```

51 \ifmubeamer@option@fonts

<code>\large</code>	PTSans-TLF	PTSans-TLF
<code>\normalsize</code>	PTSans-TLF	PTSans-TLF
<code>\small</code>	PTSans-TLF	PTSans-TLF
<code>\footnotesize</code>	PTSans-TLF	PTSansCaption-TLF
<code>\scriptsize</code>	PTSans-TLF	PTSansCaption-TLF
<code>\tiny</code>	PTSans-TLF	PTSansCaption-TLF

Table 2: The impact of optical scaling on the readability of small text

`\mubeamer@option@locale@logo` `\mubeamer@option@locale@{logo, label}` specify separately the locale for logos and for labels. Both commands inherit the value of `\mubeamer@option@locale`.

```

98 \def\mubeamer@option@locale@logo {\mubeamer@option@locale}
99 \def\mubeamer@option@locale@label{\mubeamer@option@locale}

```

4 Filenames and Pathnames

`\mubeamer@pathname@base` `\mubeamer@pathname@base` is the pathname of the base directory containing logos and labels, either directly or in subdirectories.

```

100 \def\mubeamer@pathname@base{\mubeamer/}

```

4.1 Logos and Labels

`\mubeamer@pathname@logo` `\mubeamer@pathname@{logo, label}` is the pathname of the base directory directly containing logo and label files.

```

101 \def\mubeamer@pathname@logo {\mubeamer@pathname@base logo/}
102 \def\mubeamer@pathname@label{\mubeamer@pathname@base label/}

```

`\mubeamer@filename@logo` `\mubeamer@filename@logo` is the filename of the logo that will be displayed at the top of the title page.

```

103 \def\mubeamer@filename@logo{%
104   \mubeamer@pathname@logo mubeamer-\mubeamer@option@workplace-%
105   \mubeamer@option@locale@logo
106   \ifmubeamer@option@gray\else
107     -color%
108   \fi}

```

`\mubeamer@filename@logo@fallback` `\mubeamer@filename@logo@fallback` is the filename of the logo that will be displayed at the top of the title page if `\mubeamer@filename@logo` is not found.

```

109 \def\mubeamer@filename@logo@fallback{%
110 \mubeamer@pathname@logo mubeamer-\mubeamer@option@workplace-english%
111 \ifmubeamer@option@gray\else
112 -color%
113 \fi}

\mubeamer@filename@logo@lastresort \mubeamer@filename@logo@lastresort is the filename of the logo that will be
displayed at the top of the title page if both \mubeamer@filename@logo and
\mubeamer@filename@logo@fallback are not found.
114 \def\mubeamer@filename@logo@lastresort{%
115 \mubeamer@pathname@logo mubeamer-mu-english%
116 \ifmubeamer@option@gray\else
117 -color%
118 \fi}

\mubeamer@filename@label \mubeamer@filename@label is the filename of the label that will be displayed on
the last page.
119 \def\mubeamer@filename@label{%
120 \mubeamer@pathname@label mubeamer-\mubeamer@option@workplace-%

168   \includegraphics[#1]{#2}%
169   \endgroup}

```

4.2 Patch Files

`\mubeamer@pathname@patch` `\mubeamer@pathname@patch` is the pathname of the base directory containing patch files.

```
170 \def\mubeamer@pathname@patch{\mubeamer@pathname@base patch/}
```

`\mubeamer@filename@patch` `\mubeamer@filename@patch` is the filename of the patch file that will be applied at the end of this style file.

```
171 \def\mubeamer@filename@patch{%
172   \mubeamer@pathname@patch mubeamer-\mubeamer@option@workplace}
```

5 Layout and Design

5.1 Lengths

5.1.1 Spacing

`\mubeamer@length@margin` `\mubeamer@length@margin` is the horizontal margin across all frames and the bottom margin of the title page.

```
173 \newlength\mubeamer@length@margin
```

```
174 \mubeamer@length@margin=0.7cm
```

`\mubeamer@length@footlinebottompadding` `\mubeamer@length@footlinebottompadding` is the bottom padding of the footline.

```
175 \newlength\mubeamer@length@footlinebottompadding
```

```
176 \mubeamer@length@footlinebottompadding=.163cm
```

`\mubeamer@length@footlineheight` `\mubeamer@length@footlineheight` is the total height of the footline.

```
177 \newlength\mubeamer@length@footlineheight
```

```
178 \mubeamer@length@footlineheight=.4cm
```

5.1.2 Label and Logo Size

`\mubeamer@length@logoheight` `\mubeamer@length@logoheight` specifies the height of the logo displayed at the top of the title page.

```
179 \newlength\mubeamer@length@logoheight
```

```
180 \mubeamer@length@logoheight=1.4cm
```

5.2 Colors

The following colors are specified in the `RGB` color space assuming the `sRGB IEC61966 v2.1` color profile with black scaling. The colors are taken directly from the design manual of the Masaryk University in Brno [3, 4].

5.2.1 Basic Palette

The basic palette is defined in [3, section 2.01, 4]. It consists of a base color, seven shades of gray as the neutral colors, and two hues of orange as the accent colors.

```
181 \definecolor{mubeamer@base}{RGB}{0,0,220}
```

```
182 \definecolor{mubeamer@gray1}{RGB}{240,240,240}
```

```
183 \definecolor{mubeamer@gray2}{RGB}{225,225,225}
```

```
184 \definecolor{mubeamer@gray3}{RGB}{210,210,210}
```

```
185 \definecolor{mubeamer@gray4}{RGB}{190,190,190}
```

```
186 \definecolor{mubeamer@gray5}{RGB}{170,170,170}
```

```
187 \definecolor{mubeamer@gray6}{RGB}{150,150,150}
```

```
188 \definecolor{mubeamer@gray7}{RGB}{130,130,130}
```

```
189 \definecolor{mubeamer@orange1}{RGB}{245,165,0}
```

```
190 \definecolor{mubeamer@orange2}{RGB}{240,140,0}
```

5.2.2 Faculty Colors

The faculty colors are defined in [3, section 2.03, 4].

```
191 \definecolor{mubeamer@law}{RGB}{145,0,220}
192 \definecolor{mubeamer@med}{RGB}{240,25,40}
193 \definecolor{mubeamer@sci}{RGB}{0,175,63}
194 \definecolor{mubeamer@phil}{RGB}{75,200,255}
195 \definecolor{mubeamer@ped}{RGB}{255,115,0}
196 \definecolor{mubeamer@econ}{RGB}{185,0,110}
197 \definecolor{mubeamer@fi}{RGB}{242,212,92}
198 \definecolor{mubeamer@fss}{RGB}{0,122,83}
199 \definecolor{mubeamer@fsps}{RGB}{90,200,175}
```

5.2.3 Label Background Color

The background color of the label that will be displayed on the last page.

```
200 \ifmubeamer@option@gray
201   \definecolor{mubeamer@label}{RGB}{255,255,255}
202 \else
203   \colorlet {mubeamer@label}{mubeamer@base}
204 \fi
```

5.3 Beamer Settings

5.3.1 Themes

The infolines outer theme displays the current section and subsection at the top of all frames.

```
205 \useoutertheme{infolines}
```

5.3.2 Dimensions

```
206 \setbeamersize{%
207   text margin left=\mubeamer@length@margin,
208   text margin right=\mubeamer@length@margin}
```

5.3.3 Templates

```
209 \setbeamertemplate{frametitle}{%
210   \vtop{%
211     \usebeamerfont{frametitle}{\insertframetitle}%
212     \ifx\insertframesubtitle\@empty\else\
213       \usebeamerfont{framesubtitle}{\insertframesubtitle}
214     \fi}
215   \vfill}}
```

No navigation symbols are displayed at the bottom of frames.

```
216 \setbeamertemplate{navigation symbols}{}
```

The footline displays the author, the title, the date, and the page numbers at the bottom of all frames.

```

217 \setbeamertemplate{footline}{%
218   \hskip\mubeamer@length@margin
219   \usebeamercolor[fg]{author in head/foot}%
220   \usebeamerfont{author in head/foot}\insertshortauthor
221   \usebeamercolor[fg]{structure}%
222   \usebeamerfont{structure}\ \lower2pt\hbox{\Large$\cdot$}\
223   \usebeamercolor[fg]{title in head/foot}%
224   \usebeamerfont{title in head/foot}\insertshorttitle
225   \usebeamercolor[fg]{structure}%
226   \usebeamerfont{structure}\ \lower2pt\hbox{\Large$\cdot$}\
227   \usebeamercolor[fg]{date in head/foot}%
228   \usebeamerfont{date in head/foot}\insertshortdate\hfill
229   \usebeamercolor[fg]{page number in head/foot}%
230   \usebeamerfont{author in head/foot}\insertframenum\ /
231   \inserttotalframenum
232   \hskip\mubeamer@length@margin
233   \vrule width 0pt height \mubeamer@length@footlineheight
234         depth \mubeamer@length@footlinebottompadding}

```

The title page forces bottom vertical alignment as if [b] were specified. This is to make sure that people don't end up with wonky-looking title pages by mistake.

```

235 \setbeamertemplate{title page}{%
